### Rationale

Math and Science skills are used frequently in Law, Public Safety, Corrections, and Security (LPSCS) careers. It is important for students to make this connection early while they are learning math and science subjects.

### Objectives

The student will be able to:

1. Identify the types of math and science skills used in the LPSCS field.
2. Demonstrate how math and science skills are used in specific situations and jobs.
3. Create a resume for a LPSCS job posting relating to math and science.
4. Evaluate another student's resume.

### Engage

Use the following scenario and questions for a class discussion. Use the possible answers to guide the students and the Discussion Rubric for assessment.

**Scenario:** Imagine yourself as a criminal investigator. You are working a case in which a patrol officer discovered a car that ran into a creek. There are skid marks on the road leading to the location where the car ran off of the road and into the creek. There is a decomposing, dead body in the driver's seat.

**Questions:** What needs to be determined by you and what type of math and science skills do you think you will be using?

**Possible answers:** Math to measure the skid marks in order to determine how fast the vehicle was traveling when it ran off the road, science to determine how long ago this accident occurred based on the stage of decomposition of the dead body, and science to determine if there are any alcohol or drugs in the driver's blood.
