You Failed Your Math Test, Comrade Einstein: Adventures And Misadventures Of Young Mathematicians

Misha Shifman, 2005-04-27 This groundbreaking work features two essays written by the renowned mathematician Ilan Vardi. The first essay presents a thorough analysis of contrived problems suggested to undesirable applicants to the Department of Mathematics of Moscow University. His second essay gives an in depth discussion of solutions to the Year 2000 International Mathematical Olympiad with emphasis on the comparison of the olympiad problems to those given at the Moscow University entrance examinations. The second part of the book provides a historical background of a unique phenomenon in mathematics which flourished in the 1970s 80s in the USSR. Specially designed math problems were used not to test students ingenuity and creativity but rather as killer problems to deny access to higher education to undesirable applicants. The focus of this part is the 1980 essay Intellectual Genocide written by B Kanevsky and V Senderov. It is being published for the first time. Also featured is a little known page of the Soviet history a rare example of the oppressed organizing to defend their dignity.

This is the story of the so called Jewish People s University the inception of which is associated with Kanevsky Senderov and Bella Subbotovskaya *Beyond the Best Strive* Ahmad Latief Firdasy,Azriel Daksa Alkarim, HELLO MY name is Endyna Renata Hidayat People usually call me Endyna I am now in 9th grade Soon I will graduate and continue to high school before that I want to tell the struggle experience of the Math Olympiad competition in Elementary School **THE CHINESE-AMERICAN METHOD** Linda Hu; John X. Wang,2013-01-24 Raising a child is challenging for many parents especially for a new immigrant family For those parents they not only have to face the challenges of integrating themselves into a new environment but they also need to handle the conflicts coming from two cultural backgrounds Like many Chinese Americans the authors inherited the traditional Chinese culture Yet they also opened their minds and embraced their new culture Through the collisions of these two cultures they developed a unique parenting strategy a combination of the best of both worlds to educate their children This approach offered them a cutting edge in developing their children to be among the most competitive As they raised their children they held parties to build their children s social groups used teamwork to create a harmonious family strengthening the family bonds helped their children excel in academic competitions taught their children how to be rigorous and strive for perfection inspired their children to explore innovative strategies to overcome obstacles developed their children s creativity leadership and initiative encouraged their children to be involved in the community and gave their children freedom to develop their individual personalities and discover their full potentials The authors believe that their story will be beneficial to other parents and also provide a new perspective of Chinese American families for mainstream Americans *Leningrad Mathematical Olympiads 1987-1991* Dmitrii Vladimirovich Fomin,Aleksei Kirichenko,1994 *Math Out Loud: An Oral Olympiad Handbook* Steven Klee,Kolya Malkin,Julia Pevtsova,2021-09-30 Math Hour Olympiads is a non standard method of training middle and high school students interested in mathematics where students spend several hours thinking about a few difficult and unusual problems When a student solves a problem the solution is presented orally to a pair of friendly judges Discussing the solutions with the judges creates a personal and engaging mathematical experience for the students and introduces them to the true nature of mathematical proof and problem solving This book recounts the authors experiences from the first ten years of running a Math Hour Olympiad at the University of Washington in Seattle The major part of the book is devoted to problem sets and detailed solutions complemented by a practical guide for anyone who would like to organize an oral olympiad for students in their community In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession Winning Francesco Duina,2013-08-25 Why winning doesn t always lead to happiness Most of us are taught from a young age to be winners and avoid being losers But what does it mean to win or lose And why do we care so much Does winning make us happy Winning undertakes an unprecedented investigation

of winning and losing in American society what we are really after as we struggle to win our collective beliefs about winners and losers and much more Francesco Duina argues that victory and loss are not endpoints or final destinations but gateways to something of immense importance to us the affirmation of our place in the world But Duina also shows that competition is unlikely to provide us with the answers we need Winning and losing are artificial and logically flawed concepts that put us at odds with the world around us and ultimately ourselves Duina explores the social and psychological effects of the language of competition in American culture Primarily concerned with our shared obsessions about winning and losing Winning proposes a new mind set for how we can pursue our dreams and in a more satisfying way find our proper place in the world **The**

When Online Learning is Popular and Indispensable: Theory, Research and Practice Rong Lian,Chang Liu ,Juzhe

Xi,2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance Relevant research in cognitive science has revealed possible limitations in online learning For example the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure Learners may experience cognitive overload metacognitive illusion and low learning efficiency in self regulated learning It follows that in the post COVID 19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden Therefore it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model
