Analyzing an NYSE Euronext Listing

Investors follow changes for various stocks to determine which ones to invest in. Each day, information about each company's stock is released by the stock exchanges. Often, this information is organized in a table. It is important for investors to be able to analyze the table in order to make wise investment decisions.

Directions: Examine the chart below and then answer the following questions. If you need help with the terms, reread the section on stocks in Lesson 3.

12-MONTH HI	12-MONTH LO	STOCK (SYM)	DIV	YIELD	P/E	100s	LAST	NET CHG
\$2.05	.29.95	ExxonMobil (XEL)	0.48	1.28	34.02	691	\$156	0.25
\$5.95	\$2.60	ExxonMobil (XEL)	1.28	2.13	18.25	25,995	\$4.88	-1.78
129.04	86.81	Radio Corp (RSC)	0.11	0.38	25.78	1,078	\$9.92	-5.91
15.48	6.15	Amgen (AMN)	0.88	0.78	48	75,408	\$1.99	-0.21

1. Examine column P/E. The 34.02 for ExxonMobil tells us that an investor would have to buy \$34.02 of stock to get \$1 of current earnings. Would it be a better deal or a worse deal to buy shares of Radio Corp? Why?

2. Examine the column labeled "100s." This column tells how many hundreds of stocks were traded that day. Which stock was the most traded? Which stock was the second most traded?

Economics Gary E. Clayton, 2008 *Resources in Education* , 1998 *Mathematics and Economics* Rich MacDonald, Evelyn L. Doetschman, Lisa Breidenbach, 2001 Created specifically for high school mathematics teachers this publication shows how mathematics concepts and knowledge can be used to develop economic and personal financial understandings **The American Journey** Joyce Oldham Appleby, Alan Brinkley, James M. McPherson, 2003 From Writing to Composing Teacher's Manual Beverly Ingram, Carol King, 2005-08-15 From Writing to Composing Second edition introduces high beginner to low intermediate students to the basics of formal writing in English The Teacher's Manual contains unit overviews as well as detailed descriptions of each activity complete with useful teaching tips The manual contains some additional material that teachers might use to supplement the Student's Book A complete answer key to the Student's Book is provided *Resources in Education* , 1997 Selected Water Resources Abstracts , 1979-03

Mathematics & Science in the Real World , 2000 Intellectual Capital Tom Karier, 2010-08-30 There is arguably no award more recognized in the academic and professional worlds than the Nobel Prize The public pays attention to the prizes in the fields of economics literature and peace because their recipients are identified with particular ideas concepts or actions that often resonate with or sometimes surprise a global audience The Nobel Prize in Economic Science established by the Bank of Sweden in 1969 has been granted to 64 individuals Thomas Karier explores the core ideas of the economic theorists whose work led to their being awarded the Nobel in its first forty years He also discusses the assumptions and values that underlie their economic theories revealing different and controversial features of the content and methods of the discipline The Nobelists include Keynesians monetarists financial economists behaviorists historians statisticians mathematicians game theorists and other innovators **Teacher** , 1976 **Encyclopaedia of Mathematics** Michiel Hazewinkel, 2013-12-01 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet Encyclopaedia Publishing House in five volumes in 1977 1985 The annotated translation consists of ten volumes including a special index volume There are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles dealing with the various main directions in mathematics where a rather fine subdivision has been used The main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible On the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science engineers and teachers of mathematics These articles treat their material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area in question They also contain background and motivation rather than precise statements of precise theorems with detailed

definitions and technical details on how to carry out proofs and constructions The second kind of article of medium length contains more detailed concrete problems results and techniques

Exploring the Dimensions of Human Sexuality Jerrold Greenberg, Clint Bruess, Sarah Conklin, 2010-03-10 Exploring the Dimensions of Human Sexuality Fourth Edition addresses all aspects of sexuality biological spiritual psychological and sociocultural and presents the information both factually and impartially Throughout the text students will find an emphasis on health and well being based on the assumption that we are all sexual beings and that sexuality should be viewed in its totality Students are encouraged to explore the varied dimensions of human sexuality and see how each affects their own personal sexuality sexual health and sexual responsibility

Educating Everybody's Children Robert W. Cole W. Cole, 2008-06-15 Designed to promote reflection discussion and action among the entire learning community Educating Everybody's Children encapsulates what research has revealed about successfully addressing the needs of students from economically ethnically culturally and linguistically diverse groups and identifies a wide range of effective principles and instructional strategies Although good teaching works well with all students educators must develop an extensive repertoire of instructional tools to meet the varying needs of students from diverse backgrounds Those tools and the knowledge base behind them are the foundation of this expanded and revised second edition of Educating Everybody's Children Each strategy discussed in the book includes classroom examples and a list of the research studies that support it The most important thing we have learned as a result of the education reform movement is that student achievement stands or falls on the motivation and skills of teachers We must ensure that all teachers are capable of delivering a standards based curriculum that describes what students should know and be able to do and that these standards are delivered by means of a rich and engaging pedagogy of plenty By these two acts we can ensure that all schools will be ready and able to educate everybody's children

Researchers are expected to produce original findings yet nobody explains how original contributions are conceived in economics Recently there have been calls for more creativity in economic research yet there is no literature that explores creative research apart from collections of biographical essays This book aims to address that gap exploring the process of conceiving and generating ideas for interesting and original research contributions in economics and potentially other social sciences too Creative Research in Economics serves both a practical and theoretical purpose Theoretically it presents a unique way of thinking about the nature of problems and questions in economics and the role of social science researchers in society As such it offers an interesting way to think about the philosophy of science and methodology in economics and how new ideas emerge in the discipline Practically it develops techniques for finding interesting and original research

contributions as opposed to conventional data gathering research Whether you are a graduate student looking for that first interesting question a novice researcher in search of fresh avenues for research after your PhD or a seasoned academic looking to teach the philosophy and methodology of economics in more interesting ways you will find this book of great use
