**ACT Math Personal Tutor** David Ebner,2021-01-15 Comprehensive Prep for ACT Math How is this ACT math review book different from other review books When you thumb through this book you won t feel defeated right from the start Other books present solutions in dry and ineffectual manners and in the shortest possible text They are virtually indistinguishable one from the other ACT Math Personal Tutor is different for the following reasons 1 Easy to follow step by step solutions for all problems 2 Cartoons with hints and insights for solving problems are presented in the first two exams to maintain interest and to lighten up the material Five full length exams are included 3 Because it can be rather dull to spend a lot of time reviewing basic math before tackling full fledged ACT problems a short review section at the beginning of the book presents just some foundational knowledge of mathematics Then in later sections each problem introduces a new math concept Through this method personal tutoring all the math you need for the ACT will be reviewed 4 Questions are repeated on the answer pages so that you don t have to flip through the pages to get back to the questions If your target is a top score this is the book

**Research for Educational Change** Jill Adler,Anna Sfard,2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perenial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research
