Drunkcow Landmines Daryl Meakes, 2004-11 Drunkcow landmines are wickedly unusual but oddly believable stories that have been passed along by someone who believes the story to have happened to a friend of a friend

Collateral Damage Sharon L. Nichols, David C. Berliner, 2007-03-01 Drawing on their extensive research Nichols and Berliner document and categorize the ways that high stakes testing threatens the purposes and ideals of the American education system For more than a decade the debate over high stakes testing has dominated the field of education This passionate and provocative book provides a fresh perspective on the issue and powerful ammunition for opponents of high stakes tests Their analysis is grounded in the application of Campbell's Law which posits that the greater the social consequences associated with a quantitative indicator such as test scores the more likely it is that the indicator itself will become corrupted and the more likely it is that the use of the indicator will corrupt the social processes it was intended to monitor Nichols and Berliner illustrate both aspects of this corruption showing how the pressures of high stakes testing erode the validity of test scores and distort the integrity of the education system Their analysis provides a coherent and comprehensive intellectual framework for the wide ranging arguments against high stakes testing while putting a compelling human face on the data marshalled in support of those arguments

Shadow Education as Worldwide Curriculum Studies Young Chun Kim, Jung-Hoon Jung, 2019-02-21 This book

theorizes shadow education as a new component of curriculum expanding the concept of curriculum to include this type of learning Curriculum scholars and theorists have largely disregarded shadow education as a valid topic of scholarly attention despite its massive growth worldwide But shadow education has become a global phenomenon with ever increasing numbers of student participants it complements school based curricula in many cases going beyond Thus Jung and Kim argue that shadow education requires rigorous analysis by curriculum studies scholars This volume analyzes the state and importance of shadow education in countries around the world its representative forms and industries private tutoring institutes home visit private tutoring Internet based private tutoring subscribed learning programs after school programs its characteristic forms in terms of curriculum and its roles in student learning It also explores various features of shadow education based on an eight year ethnographic study in South Korea
