Interpellations, Questions and Replies of the National Assembly South Africa. Parliament (1994-). National Assembly,1997 **Knowledge, Curriculum and Equity** Brian Barrett,Ursula Hoadley,John Morgan,2017-07-20 In 2008 the first in a series of symposia established a social realist case for knowledge as an alternative to the relativist tendencies of the constructivist post structuralist and postmodernist approaches dominant in the sociology of education The second symposium focused on curriculum and the development of a theoretical language grounded in social realism to talk about issues of knowledge and curriculum Finally the third symposium brought together researchers in a broad range of contexts to build on these ideas and arguments and with a concerted empirical focus bring these social realist ideas and arguments into conversation with data Knowledge Curriculum and Equity Social Realist Perspectives contains the work of the third symposium where the strengths and gaps in the social realist approach are identified and where there is critical recognition of the need to incrementally extend the theories through empirical study Fundamentally the problem that social realism is seeking to address is about understanding the social conditions of knowledge production and exchange as well as its structuring in the curriculum and in pedagogy The central concern is with the on going social reproduction of inequality through schooling and exploring whether and how foregrounding specialised knowledge and its access holds the possibility for interrupting it This book consists of 13 chapters by different authors working in Oceania Asia Europe Africa and North America From very different vantage points the authors focus their theoretical and empirical sights on the assumptions about knowledge that underpin educational processes and the pursuit of more equitable schooling for all The Emperor's New Computer ,2019-02-11 c ICT s subtle and seductive impact on educational administration globalisation curriculum design development and delivery and teacher roles and responsibilities has challenged the privileged notion of how education in society is or should be delivered Most schools and curricula require ICT enabled or supported courses as part of their mission or design Yet the seeming ubiquitous adoption of ICT has not made the technology s use any less controversial There is much that is still puzzling and troubling about Information and Communication Technology and its impact on teachers and learners The Emperor s New Computer ICT Teaching and Learning presents nine chapters that reflect international points of view on the intersection of Information and Communication Technology and education pose critical questions about ICT s use and examine ways of navigating the complex paths that ICT has carved in all aspects of global education society and culture

Report of the Annual Meeting of the South African Association for the Advancement of Science ,1995

Debates of the National Assembly (Hansard) South Africa. Parliament (1994-). National Assembly,1997 **A Vision for Science Education** Roger Cross,2004-08-02 One of the most important and consistent voices in the reform of science education over the last thirty years has been that of Peter Fensham His vision of a democratic and socially responsible science education for all has inspired change in schools and colleges throughout the world Often moving against the tide

Fensham travelled the world to promote his radical ideology. He was appointed Australia's first Professor of Science Education and was later made a Member of the Order of Australia in recognition of his work in this new and emerging field of study. In this unique book leading science educators from around the world examine and discuss Fensham's key ideas. Each describes how his arguments, proposals and recommendations have affected their own practice and extend and modify his message in light of current issues and trends in science education. The result is a vision for the future of science teaching internationally. Academics, researchers and practitioners in science education around the world will find this book a fascinating insight into the life and work of one of the foremost pioneers in science education. The book will also make inspiring reading for postgraduate students of science education.

Contemporary South Africa and the Political Economy of Regional Development Methembe Mdlalose, Isaac Khambule, Nene Ernest Khalema, 2025-02-21 South Africa's struggle in balancing its domestic needs while playing a dynamic developmental role in the African region and global context exposes a complex web of relations shaped by its geostrategic location on the continent and the world and the staggering legacies of colonialism and apartheid. As such, understanding the complexities of the global economy and of South Africa's place in it is of great importance. This book builds upon an existing body of literature which has demonstrated that while the post-apartheid South African state has recast its nation-building goals with advances having been made notably in the area of a stellar post-apartheid constitution, policy directives and democratic political integration, economic integration and policy implementation presents a projection of captured interests where big business concerns are entrenched in the post-apartheid state's apparent neo-liberal turn. The main focus of the book is to contextualise issues relating to three main trends in global discourses on development which are significant for South Africa and indeed for the study of the political economy of regional development in the country from the prism of South Africa as a global capitalist state. These trends include the impact of globalisation, regionalisation and the marginalisation of South Africa and indeed the African continent in the global economy, thus unpacking the possible role that South Africa might play in regional development. This volume will be a valuable resource to academics, researchers and students in the fields of regional studies, economics and political theory as well as policymakers, planners and local economic development practitioners.

Cases on Quality Initiatives for Organizational Longevity Krishnan, Archana, 2018-06-20 Over the past decade, increasing competition has created immense opportunities for businesses globally. As such, it is important to research new methods and systems for creating optimal business cultures. *Cases on Quality Initiatives for Organizational Longevity* is a scholarly publication that examines cases on practices in organizations and how they have facilitated transformation over the years. Featuring coverage on a broad range of topics such as customer loyalty, benchmarking and employee training, this book is geared toward business owners, managers, entrepreneurs, professionals, researchers and students seeking current and relevant research on contemporary cases in the field of business quality management.

Pedagogy in Poverty Ursula Hoadley, 2017-08-09 As

South Africa transitioned from apartheid to democracy changes in the political landscape as well as educational agendas and discourse on both a national and international level shaped successive waves of curriculum reform over a relatively short period of time Using South Africa as a germane example of how curriculum and pedagogy can interact and affect educational outcomes Pedagogy in Poverty explores the potential of curricula to improve education in developing and emerging economies worldwide and ultimately to reduce inequality Incorporating detailed empirical accounts of life inside South African classrooms this book is a much needed contribution to international debate surrounding optimal curriculum and pedagogic forms for children in poor schools Classroom level responses to curriculum policy reforms reveal some implications of the shifts between a radical progressive approach and traditional curriculum forms Hoadley focuses on the crucial role of teachers as mediators between curriculum and pedagogy and explores key issues related to teacher knowledge by examining the teaching of reading and numeracy at the foundational levels of schooling Offering a data rich historical sociology of curriculum and pedagogic change this book will appeal to academics researchers and postgraduate students in the fields of education sociology of education curriculum studies educational equality and school reform and the policy and politics of education
