was developed by Nagant a Belgian All Soviet bolt action military rifles and carbines are Mosin Nagant weapons and all are basically similar to the original Mosin Nagant rifle adopted by Russia in 1891 These weapons can be considered reasonably effective infantry weapons Fairly good shooting can be done with them at combat ranges although their sights do not lend themselves to the finer degrees of accuracy which can be obtained with similar United States weapons They suffer from an overcomplicated bolt but in other respects are relatively simple to service and maintain The safety in that it is extremely hard to engage and disengage represents a shortcoming of the weapons
