Motivation In Education Theory Research And Applications 3rd Edition:

Motivation in Education Dale H. Schunk, Paul R. Pintrich, Judith L. Meece, 2010 The primary objectives of Motivation in Education Theory Research and Application third edition are to present major motivational theories principles and research findings in sufficient detail to help students understand the complexity of motivational processes and to provide examples of motivational concepts and principles applied to educational settings Although different perspectives on motivation are presented the text emphasizes the role of personal cognitions and beliefs during teaching and learning This focus is consistent with the view that learners are active constructive participants in the learning process consequently the text highlights how motivation is situated facilitated and constrained by various classroom and contextual factors Following an introductory chapter that defines and exemplifies motivation and discusses motivation research how motivation relates to learning and historical views of motivation the next six chapters discuss theoretical and conceptual perspectives that stress the role of personal cognitions beliefs affects and values in motivation expectancy value theory attribution theory social cognitive theory goal theory interest and affect and intrinsic and extrinsic motivation The remaining three chapters focus on various contextual factors in promoting motivation sociocultural influences teacher influences and classroom and school influences By blending theory research and applications throughout the text provides instructors and students with a unified view of the role of motivation in education Motivation in Education: Theory, Research, and Applications Dale H.

Schunk, Judith R Meece, Paul R. Pintrich, 2013-10-03 The academic standard for texts on motivation in educational settings Clear and engaging Motivation in Education Theory Research and Applications Fourth Edition presents the major motivation theories principles and research findings in sufficient detail to help students understand the complexity of motivational processes and provides extensive examples of the application of motivational concepts and principles in educational settings From reviews of Motivation in Education I find it essential that students have access to such strong representations of the basic theories and work in the field of motivation This book goes a long way toward reinforcing the voices of experts who make data driven decisions about how to foster motivation There are no available books on motivation as excellently crafted as this one Theresa A Thorkildsen University of Illinois at Chicago This book is certainly the most comprehensive treatment of motivation There are several others I have perused but they often take a certain approach to motivation whereas this book covers ALL approaches The authors present a very complete and unbiased treatment of the literature Daniel H Robinson University of Texas

Developing Future-ready Learners for a Global Age Suzanne S. Choo, Woon Chia Liu, Bee Leng Chua, 2024-12-02 Suzanne S Choo Woon Chia Liu and Bee Leng Chua offer a dynamic look into the tripartite relationship between education research policy and practice that characterizes Singapore's changing education landscape. Over the years, Singapore has garnered increasing attention internationally for its world-class education system. Pushing back against the stereotypical notions of exam and teacher-centric education in Asia, the contributors to this volume discuss opportunities as well as challenges in Singapore's innovation towards constructivist, critical, culturally responsive and cosmopolitan forms of learning. Highlighting the pedagogical innovation and its context in Singapore's teacher education and schools, the authors bridge theory and practice by providing an understanding of innovative practices informed by key shifts in Singapore's education policies and the key conceptual principles informing these practices. More importantly, it provides on-the-ground empirical insights into the ways these innovative pedagogical practices are enacted in the classroom and in teacher education programmes. Each chapter provides an in-depth understanding of how these pedagogies are applied across various subject disciplines including guided problem solving in Mathematics, games-based pedagogy in Science, multimodal literacies in language, ethical criticism in Literature, Nonlinear Pedagogy in Physical Education, multicultural approaches in music and dialogic pedagogy in drama, among others. Balancing theoretical and empirical focus, this resourceful text will be of interest to students, researchers and practitioners in educational development, pedagogy and teacher education as well as policymakers across international fields in education.

Young People's Voice in School Science Marianne Logan, 2023-11-27 This book highlights young people's changing attitudes toward and interest in science over the course of a five-year longitudinal study. Utilizing a mixed methods approach, the author presents rich data from children and young people as well as their parents and teachers. By providing a glimpse of science pedagogy from the perspective of young people and those who work with them, the book identifies factors that affect students' interest in science throughout their primary and secondary education. The book also examines a posthumanist philosophical approach to science education and emphasizes the interrelationship of all things within the context of science education.

The Art of Teaching Medical Students - E-Book Pritha Bhuiyan, Avinash Supe, Nirmala Rege, 2015-07-31 It is for all those medical professionals who are involved in the process of teaching. Although the general principles of teaching remain the same worldwide, this book is tailored to meet the demands of Faculty Development in a Medical Institution. This is a text in demand from not only medical teachers but also from all the faculty of paramedical and allied health courses. Covers three broad aspects of teaching and learning viz i Technology in and of education ii Management of education and iii Educational research. Beautifully illustrated educational science applies to medical teachers as well as members of healthcare team and also all those who are involved in the art of teaching. Authored by experts who have vast experience in medical education at both national and international levels. Their vision, thought process and knowledge get reflected in their writings.

A must read book for every young faculty making his/her entry in the educational field as a medical teacher before embarking on educational activities
