istituzioni biomediche che erogano servizi dedicati alla riabilitazione neurologica ha il pregio di delineare lo stato dell'arte e di offrire protocolli supportati dalle evidenze scientifiche prodotte dalle più recenti ricerche in ambito clinico e neuroscientifico. Neurological conditions are increasingly widespread requiring progressively more refined rehabilitation protocols based on scientific evidence. The deficits produced by these conditions can impair the nervous system, altering its functions and causing varying degrees of disability. Neurorehabilitation therefore involves the use of sophisticated diagnostic techniques and the application of protocols for functional rehabilitation of deficits aimed at reducing specific disabilities.

Handbook of Neurorehabilitation and Principles of Neurology is split into four parts. Parts one and two are more propaedeutic in nature and focus respectively on the neurobiological basis of neurorehabilitation and the general principles of motor and cognitive neurorehabilitation. Part three is devoted to the complex issues concerning the organization of services for patients. The final and by far the largest part covers all the neurological disorders requiring rehabilitative treatment. Each individual nosological category is presented by first considering the diagnostic criteria and then illustrating the most suitable rehabilitation protocols to obtain a reduction in deficits and disabilities. Written by specialists and aimed at all healthcare professionals working in biomedical institutions that provide neurological rehabilitation services, the book has the merit of outlining the state of the art and proposing evidence-based protocols supported by the latest research in the clinical and neuroscientific field.

Then, understanding the disablement process, you'll be able to organize the clinical data that leads to therapeutic interventions for specific underlying impairments and functional activity limitations that can then be applied as appropriate anytime they are detected, regardless of the medical diagnosis.
