Geometry and Vision Minh Nguyen, Wei Qi Yan, Harvey Ho, 2021-03-17 This book constitutes selected papers from the First International Symposium on Geometry and Vision ISGV 2021 held in Auckland New Zealand in January 2021 Due to the COVID 19 pandemic the conference was held in partially virtual format The 29 papers were thoroughly reviewed and selected from 50 submissions They cover topics in areas of digital geometry graphics image and video technologies computer vision and multimedia technologies

Discrete Geometry for Computer Imagery Rocio Gonzalez Diaz, Maria Jose Jimenez, Belen Garfia Medrano, 2013-03-17 This book constitutes the thoroughly refereed proceedings of the 17th International Conference on Discrete Geometry for Computer Imagery DGCi 2013 held in Seville Spain in March 2013 The 34 revised full papers presented were carefully selected from 56 submissions and focus on geometric transforms discrete and combinatorial tools for image segmentation and analysis discrete and combinatorial topology discrete shape representation recognition and analysis models for discrete geometry morphological analysis and discrete tomography

Digital and Discrete Geometry Li M. Chen, 2014-12-12 This book provides comprehensive coverage of the modern methods for geometric problems in the computing sciences It also covers concurrent topics in data sciences including geometric processing manifold learning Google search cloud data and R tree for wireless networks and BigData The author investigates digital geometry and its related constructive methods in discrete geometry offering detailed methods and algorithms The book is divided into five sections basic geometry digital curves surfaces and manifolds discretely represented objects geometric computation and processing and advanced topics Chapters especially focus on the applications of these methods to other types of geometry algebraic topology image processing computer vision and computer graphics Digital and Discrete Geometry Theory and Algorithms targets researchers and professionals working in digital image processing analysis medical imaging such as CT and MRI and informatics computer graphics computer vision biometrics and information theory Advanced level students in electrical engineering mathematics and computer science will also find this book useful as a secondary text book or reference Praise for this book This book does present a large collection of important concepts of mathematical geometrical or algorithmical nature that are frequently used in computer graphics and image processing These concepts range from graphs through manifolds to homology Of particular value are the sections dealing with discrete versions of classic continuous notions The reader finds compact definitions and concise explanations that often appeal to intuition avoiding finer but then necessarily more complicated arguments As a first introduction or as a reference for professionals working in computer graphics or image processing this book should be of considerable value Prof Dr Rolf Klein University of Bonn

Geometric Structures of Statistical Physics, Information Geometry, and Learning Frédéric Barbaresco, Frank Nielsen, 2021-06-27 Machine learning and artificial intelligence increasingly use methodological tools rooted in statistical physics Conversely limitations and pitfalls encountered in AI question the very foundations of statistical

physics This interplay between AI and statistical physics has been attested since the birth of AI and principles underpinning statistical physics can shed new light on the conceptual basis of AI During the last fifty years statistical physics has been investigated through new geometric structures allowing covariant formalization of the thermodynamics Inference methods in machine learning have begun to adapt these new geometric structures to process data in more abstract representation spaces This volume collects selected contributions on the interplay of statistical physics and artificial intelligence The aim is to provide a constructive dialogue around a common foundation to allow the establishment of new principles and laws governing these two disciplines in a unified manner The contributions were presented at the workshop on the Joint Structures and Common Foundation of Statistical Physics Information Geometry and Inference for Learning which was held in Les Houches in July 2020 The various theoretical approaches are discussed in the context of potential applications in cognitive systems machine learning signal processing
