Test Fairness in the New Generation of Large-Scale Assessment Hong Jiao,Robert W. Lissitz,2017-06-01 The new generation of tests is faced with new challenges In the K 12 setting the new learning targets are intended to assess higher order thinking skills and prepare students to be ready for college and career and to keep American students competitive with their international peers In addition the new generation of state tests requires the use of technology in item delivery and embedding assessment in real world authentic situations It further requires accurate assessment of students at all ability levels One of the most important questions is how to maintain test fairness in the new assessments with technology innovative items and technology delivered tests In the traditional testing programs such as licensure and certification tests and college admission tests test fairness has constantly been a key psychometric issue in test development and this continues to be the case with the national testing programs As test fairness needs to be addressed throughout the whole process of test development experts from state admission and licensure tests will address test fairness challenges in the new generation assessment The book chapters clarify misconceptions of test fairness including the use of admission test results in cohort comparison the use of international assessment results in trend evaluation whether standardization and fairness necessarily

mean uniformity when test takers have different cultural backgrounds and whether standardization can insure fairness More technically chapters also address issues related to how compromised items and test fairness are related to classification decisions how accessibility in item development and accommodation could be mingled with technology how to assess special populations with dyslexia using Blinder Oaxaca Decomposition for differential item functioning detection and differential feature functioning in automated scoring Overall this book addresses test fairness issues in state assessment college admission testing international assessment and licensure tests Fairness is discussed in the context of culture and special populations Further fairness related to performance assessment and automated scoring is a focus as well This book provides a very good source of information related to test fairness issues in test development in the new generation of assessment where technology is highly involved Strategies for Test-taking Success Newman,2005-07 Strategies for Test Taking Success is an innovative test preparation series designed to help all students develop effective test taking skills and strategies regardless of their English language proficiency or academic level Each book in the Strategies series focuses on a major testing discipline *New York Math: Math B* ,2000 *The College Blue Book* Macmillan Publishing,2004-11 Indexes the degrees offered by thousands of colleges in the U S and Canada in two lists one alphabetically by state or province and one by subject area Science & Engineering Indicators ,1993 *Slope Stability Reference Guide for National Forests in the United States* ,1994
