

## Secant and Tangent Relationships

**Tangent Theorem:** The perpendicular (or segment, or ray) is perpendicular to the radius of the circle at tangency.

This theorem is often used to solve right triangle problems with circles.

**Secant Theorem 1:** If two secant segments from a point outside the circle intersect the circle, the products of the measures of the segments of the secants are equal.

$$TA \cdot TB = TC \cdot TD = 12 \cdot 16 = 192$$

$$TA = 12$$

$$TB = 16$$

$$TC = 10$$

$$TD = \underline{\hspace{2cm}}$$

**Secant Theorem 2:** If two secant segments are drawn to a circle from an external point outside the circle, the product of the measures of one secant segment and its external secant segment is equal to the product of the measures of the other secant segment and its external secant segment.

$$CE \cdot CF = DE \cdot DF = 12 \cdot 16 = 192$$

$$CE = 12$$

$$CF = 16$$

$$DE = 10$$

$$DF = \underline{\hspace{2cm}}$$

**Exploring Math with Technology** Allison W. McCulloch, Jennifer N. Lovett, 2023-08-01 This timely book provides support for secondary mathematics teachers learning how to enact high quality equitable math instruction with dynamic mathematics specific technologies Using practical advice from their own work as well as from interviews with 23 exceptional technology using math teachers the authors develop a vision of teaching with technology that positions all students as powerful doers of mathematics using math specific technologies e g dynamic graphing and geometry applications data exploration tools computer algebra systems virtual manipulatives Each chapter includes sample tasks advice from technology using math teachers and guiding questions to help teachers with implementation The book offers a rich space for secondary math teachers to explore important pedagogical practices related to teaching with technology combined with broader discussions of changing the narratives about students emphasizing the mathematics they can do and the mathematics they deserve Accompanying online support materials include video vignettes of teachers and students interacting around technology enhanced tasks in the classroom as well as examples of more than 30 high quality technology enhanced tasks

**Tenative Course of Study in Senior High School Mathematics (demonstrative Geometry) Tenth Year** Rochester (N.Y.). Board of Education, 1929      Teaching and Learning High School Mathematics Charlene E. Beckmann, Denisse R. Thompson, Rheta N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich

mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans *The Teaching of High School Mathematics* Jasper O.
