Isaac Vossius and his Circle F.F. Blok,2021-10-18 This book gives a detailed account of the most interesting period in the life of the Dutch humanist scholar Isaac Vossius Leiden 1618 Windsor 1689 It is largely based on Vossius s extensive correspondence much of which has never been published before In particular Isaac s correspondence with his father Gerardus Joannes Vossius has been thoroughly investigated and is a prime source of information here Isaac Vossius s travels through England France and Italy followed his formative years at Leiden and Amsterdam during which time he had come under the strong influence of the French scholar Claude Saumaise A narrative account of these travels is given and Vossius s contacts with the various circles of scholars that he encountered are discussed in detail Such contacts allowed him to enter libraries otherwise difficult of access and there he continued his search for manuscripts Vossius s period as a wandering scholar can be said to have been rounded off with the year that he spent in Paris as secretary to Hugo Grotius All this time Vossius was building up his own collection of books and the fruits of these library researches were the philological editions that he began to publish in the four years that followed A new phase of Vossius s life opened in 1648 when Queen Christina of Sweden invited him then still only thirty to come to her court The following six years were the most turbulent in the scholar s life He became the queen s tutor in Greek and also her personal confidant Under Vossius s guidance the queen steeped herself in the study of Plato and the Neoplatonists while the philosophy of Descartes whom she likewise invited to Stockholm seems to have held little interest for her It was while Vossius was at the Swedish court that he finally came into open conflict with Saumaise his former mentor Vossius built up a magnificent library for Christina This collection was however dispersed even before it has been completed though unfortunately not before Vossius s own books had been inadvertently incorporated into that library With the queen s approval Vossius then selected a new collection for himself from the royal library In 1655 Vossius disillusioned withdrew to the quiet of his own study in The Hague Since 1690 his collection of books and manuscripts has been housed in the University Library at Leiden where it forms the basis of the international fame of that institution

The Electrician ,1879 *The Electrical Journal* ,1909 ERDA Energy Research Abstracts United States. Energy Research and Development Administration,1977 *Reactor Materials* ,1962 **Integrated Life-Cycle and Risk Assessment for Industrial Processes and Products** Guido Sonnemann,Michael Tsang,Marta Schuhmacher,2018-10-10

Life cycle assessment is a methodology used to evaluate the environmental impacts of a product process or service during its life cycle and risk assessment is a tool to evaluate potential hazards to human health and the environment introduced by pollutant emissions The United Nations Sustainable Development Goals call for among other objectives responsible consumption and production by decoupling environmental resource use and environmental impacts from economic growth and human well being Life cycle assessment and risk assessment are both analytical system approaches that allow scientists and other decision makers to address these issues and objectives according to the current understanding of environmental mechanisms This book is the first attempt to illustrate the existing interfaces between life cycle assessment and risk assessment and to indicate options for further integration of both tools The second edition Focuses on sustainability Considers new developments in life cycle assessment and environmental risk assessment over the last ten years at the international level Introduces broader concepts and discussions on integrative versus the complementary use of life cycle and risk assessments Extends the scope of integrated life cycle and risk assessments to critical raw materials Includes more case studies and discusses engineered nanomaterials Featuring contributions from leading experts Integrated Life Cycle and Risk Assessment for Industrial Processes and Products is a great reference for graduate students and professionals in environmental management and intends to catalyze communication between life cycle assessment and risk assessment experts and scientists in academia industry and governmental agencies The practical format of the book illustrated with flowcharts examples exercises and concrete applications makes it a useful manual for analyzing situations and making decisions
