*Legislative Calendar* United States. Congress. House. Committee on Agriculture, 2013      **The effect of land inheritance on youth employment and migration decisions: Evidence from rural Ethiopia** Kosec, Katrina, Ghebru, Hosaena, Holtemeyer, Brian, Mueller, Valerie, Schmidt, Emily, 2017-03-28 In Ethiopia there are two binding forces push and pull that deserve attention when it comes to youth occupational and spatial mobility choices and the national land use and transfer policy On the one hand the fact that the land rental market in Ethiopia is supply constrained due to market and policy distortions marginalizes youth and serves as a push factor leading them to look elsewhere for a livelihood strategy On the other hand the regulatory conditions and restrictions attached to land use and inheritance rights may serve as a pull factor and force youth to be tied to the rural and or farming sector Our study thus aims to explore how youth land access both inheritance and market based affects their migration and employment decisions We explore this question in the context of rural Ethiopia using panel data from 2010 and 2014 We find that larger expected land inheritances significantly lower the likelihood of long distance permanent migration and of permanent migration to urban areas during this time Inheriting more land is also associated with a significantly higher likelihood of employment in agriculture and a lower likelihood of employment in the nonagricultural sector Conversely the decision to attend school is unaffected These results appear to be most heavily driven by males and by the older half of our youth sample We also find several mediating factors matter Land inheritance plays a much more pronounced role in predicting rural to urban permanent migration and nonagricultural sector employment in areas with less vibrant land markets and in relatively remote areas those far from major urban centers Overall the results reaffirm the notion that push factors dominate pull factors in dictating occupational and migration decisions in Ethiopia and highlight youth preferences to use migration or non agricultural employment as a last resort after exhausting other means of accessing land such as temporary land rental      *Title 7 Agriculture Part 2000 to End (Revised as of January 1, 2014)* Office of The Federal Register, Enhanced by IntraWEB, LLC, 2014-01-01 The Code of Federal Regulations Title 7 contains the codified Federal laws and regulations that are in effect as of the date of the publication pertaining to agriculture

*Timber traceability – A management tool for governments* Food and Agriculture Organization of the United Nations, World Resources Institute, 2022-06-20 There are growing demands for countries to develop national timber traceability systems These demands range from a country's own needs to track timber and collect associated revenues consistently to international demands for due diligence regarding the legality of the timber for imports and in some cases where a country has entered into a Voluntary Partnership Agreement VPA with the EU In response many countries have made considerable efforts to develop national systems which track timber flow from producer through processing to the point of sale and there are different approaches and tools available for doing this This report aims to document lessons and best practices in the planning of government led timber traceability systems in Latin America to provide a reference for

government officials in other countries who are tasked with developing and implementing similar systems It also seeks to help other audiences recognize that traceability is global trend and is becoming a new norm for conducting business and trade in international wood markets The report focuses on experiences in Latin America where governments have proactively implemented traceability systems and demonstrated a relatively high capacity in doing so leveraging technologies and equipment to respond to the unique needs of their countries As many of these systems are modular successful and relevant elements can easily be transferred from one context to another and adapted to suit the needs of those tasked with designing similar systems

**Handbook of Research on Microbial Remediation and Microbial Biotechnology for Sustainable Soil** Malik, Junaid Ahmad, 2021-06-11

The introduction of contaminants due to rapid urbanization and anthropogenic activities into the environment causes distress to the physio chemical systems including living organisms which possibly is threatening the dynamics of nature as well as the soil biology by producing certain xenobiotics Hence there is an immediate global demand for the diminution of such contaminants and xenobiotics that can otherwise adversely affect the living organisms Some toxic xenobiotics include synthetic organochlorides such as PAHs and some fractions of crude oil and coal Over time microbial remediation processes have been accelerated to produce better more eco friendly and more biodegradable solutions for complete dissemination of these xenobiotic compounds The advancements in microbiology and biotechnology led to the launch of microbial biotechnology as a separate area of research and contributed dramatically to the development of areas like agriculture environment biopharmaceutics fermented foods and more The Handbook of Research on Microbial Remediation and Microbial Biotechnology for Sustainable Soil provides a detailed comprehensive account for microbial treatment technologies bioremediation strategies biotechnology and the important microbial species involved in remediation The chapters focus on recent developments in microbial biotechnology in the areas of agriculture and environment and the physiology biochemistry and the mechanisms of remediation along with a future outlook This book is ideal for scientists biologists academicians students and researchers in the fields of life sciences microbiology environmental science environmental engineering biotechnology agriculture and health sciences

Leave no child behind UNESCO, 2022-06-20 To leave no child behind UNESCO developed the first global report of this scope on boys disengagement from education bringing together qualitative and quantitative evidence from over 140 countries This report provides an overview on the global situation on boys disengagement from and disadvantage in education It identifies factors influencing boys participation progression and learning outcomes in education It also analyses responses by governments and partners and examines promising policies and programmes Finally it includes recommendations on how to engage boys with education and address disadvantage While girls continue to face severe disadvantages and inequalities in education the report shows that boys in many countries are at greater risk than girls of repeating grades failing to complete different education levels and

having poorer learning outcomes in school. No less than 132 million boys of primary and secondary school age are out of school. They urgently require support. As this report shows, supporting boys does not mean that girls lose out and vice versa. Addressing boys' disengagement not only benefits boys' learning, employment opportunities, income, and well-being; it is also highly beneficial for achieving gender equality and desirable economic, social, and health outcomes. ### **Food-Energy-Water Systems: Achieving Climate Resilience and Sustainable Development in the 21st Century**

Charles Vörösmarty, Richard Lawford, Pietro Elia Campana, Donald Wuebbles, Graham Jewitt, 2024-01-23. Extreme weather will mean ongoing challenges to the capacity of these sectors to support human well-being, grow the economy, and provide critical environmental services. Society has yet to evaluate the resilience of FEWS to climate environmental and management stresses as it shapes strategies to support sustainable development over the next decades. These issues constitute a quintessential interdisciplinary research challenge and require a well-structured science agenda and supportive information services for implementing key findings that governments and stakeholders can adopt. Integrated policy pathways require usable research findings, applications, models, real-time information systems, and decision support systems. In addition, stakeholder engagement is essential to communicate the benefits and results of these approaches and to engage appropriate groups in their implementation.
