Connolly, 2014-08-25 Many people characterize urban renewal projects and the power of eminent domain as two of the most widely despised and often racist tools for reshaping American cities in the postwar period In A World More Concrete N D B Connolly uses the history of South Florida to unearth an older and far more complex story Connolly captures nearly eighty years of political and land transactions to reveal how real estate and redevelopment created and preserved metropolitan growth and racial peace under white supremacy Using a materialist approach he offers a long view of capitalism and the color line following much of the money that made land taking and Jim Crow segregation profitable and preferred approaches to governing cities throughout the twentieth century A World More Concrete argues that black and white landlords entrepreneurs and even liberal community leaders used tenements and repeated land dispossession to take advantage of the poor and generate remarkable wealth Through a political culture built on real estate South Florida s landlords and homeowners advanced property rights and white property rights especially at the expense of more inclusive visions of equality For black people and many of their white allies uses of eminent domain helped to harden class and color lines Yet for many reformers confiscating certain kinds of real estate through eminent domain also promised to help improve housing conditions to undermine the neighborhood influence of powerful slumlords and to open new opportunities for suburban life for black Floridians Concerned more with winners and losers than with heroes and villains A World More

Concrete offers a sober assessment of money and power in Jim Crow America. It shows how negotiations between powerful real estate interests on both sides of the color line gave racial segregation a remarkable capacity to evolve, revealing property owners' power to reshape American cities in ways that can still be seen and felt today. *Deterritorializing/Reterritorializing* Nancy Ares, Edward Buendía, Robert Helfenbein, 2017-05-10. This volume features scholars who use a critical geography framework to analyze how constructions of social space shape education reform. In particular, they situate their work in present-day neoliberal policies that are pushing responsibility for economic and social welfare as well as education policy and practice out of federal and into more local entities. States, cities, and school boards are being given more responsibility and power in determining curriculum content and standards, accompanied by increasing privatization of public education through the rise of charter schools and for-profit organizations' incursion into managing schools. Given these pressures, critical geography's unique approach to spatial constructions of schools is crucially important. Reterritorialization and deterritorialization or the varying flows of people and capital across space and time are highlighted to understand spatial forces operating on such things as schools, communities, people, and culture. Authors from multiple fields of study contribute to this book's examination of how social, political, and historical dimensions of spatial forces, especially racial, ethnic, and other markers of difference, shape and are shaped by processes and outcomes of school reform. **The Land Between the Lakes**

Ronald A. Foresta, 2013-11-01. Between Barkley and Kentucky Lakes, two great artificial bodies of water in western Tennessee and western Kentucky, lies a wooded land that looks from above like the flattened thumb of a green giant. Once a land of marginal farms and small settlements, this 240 square mile peninsula, known as the Land Between the Lakes, has been a national recreation area for the last half century. Its rolling wooded hills and open bottomlands give the place charm, but little majesty. The place swallows up its few campgrounds and visitors; they attract, creating a vacuous tranquility. In this volume, Foresta explores how this forgotten and bypassed region became a national recreation area. He uses its history to retrieve our old attitudes toward nature, progress, and personal development. He also uses its history to retrieve a vision of the future that rallied idealists, intellectuals, and even public officials to its banner. In the early 1960s, the Tennessee Valley Authority set out to create a great park for posterity at the Land Between the Lakes. The park was to host the vast stretches of leisure that wealthy, secure, and more equal Americans of the late twentieth and early twenty-first centuries would have at their disposal. It would be a place where such Americans could turn that leisure into happiness, psychic well-being, and strength of character. The TVA cleared the land of its inhabitants to create the park, removing people from their homes and severing their roots, thus effacing the history of the place. It then set about reshaping the land in the image of an anticipated future. But when that future never arrived, managers struggled to fit the place to the America that actually came into being. In the end, they failed, leaving the Land Between the Lakes enveloped in a haunting sense of emptiness. A deft blend of environmental history, geography, politics, and cultural history, *Land Between the Lakes* demonstrates both the idealism of mid-twentieth-century

planners and how quickly such idealism can fall out of alignment with the flow of history In so doing it explores a forgotten vision of the future that was in many ways more appealing than the present that came into being in its place **American Book Publishing Record Cumulative, 1876-1949** R.R.
