### Paper 1 Example (3 SAQs & 1 ERQ)

Answer all questions in this section. Marks will be awarded for focused answers supported by relevant knowledge and study.

1. Describe neuroplasticity, with reference to one study. [9 marks]

Neuroplasticity is the brain's ability to change in response to environmental demands. This occurs through neuronal unmasking and neural pruning. Neuronal unmasking is when the brain activates dormant neurons and strengthens them through practice, which increases neuronal density in the areas of the brain with recent patterns of activity. Long-term potentiation is the term used for the strengthening of neural networks through recent patterns of activity in specific regions of the brain that cause a long-lasting increase in signal transmission in those regions and this explains how the brain structure changes as a result of environmental demands. However, a lack of activity in neural networks leads to the weakening and the elimination of these networks which is known as neural pruning. Many studies have investigated neuroplasticity in action, namely Maguire et al. (2000) which investigated whether structural changes were evident in the brains of people with extensive experience in spatial navigation.

The study compared MRI scans of 16 right-handed male taxi drivers in London that have all been driving for at least 1.5 years to the MRI scans of 50 right-handed males from the London Hospital who were not taxi drivers. The mean age did not differ between the experimental group and the control group. They found that the taxi drivers had increased grey matter in the hippocampal areas as compared to the control group which suggests that the hippocampus plays a role in spatial navigation. Furthermore, they found that the taxi drivers had larger posterior hippocampi than the control group, whilst the control group had larger anterior hippocampus than the taxi drivers. This demonstrates long-term potentiation occurring in the taxi drivers' posterior hippocampi. Since, the taxi drivers use their spatial navigation skills frequently, the recent activity in the posterior hippocampus leads to the strengthening of the neural networks in that region which increases the neural density and is evident through the larger volume of the posterior hippocampus in the taxi drivers. Moreover, a positive correlation between the number of years driving and the volume of the posterior hippocampus was discovered, which creates a direct link between increased use of spatial navigation skills and the volume of that region. This further demonstrates the effects of long-term potentiation on brain structure and, therefore, the relationship between brain structure and environmental demands. They concluded that the structural changes were evident in the brains of the taxi drivers, with extensive experience in spatial navigation and the findings of this study act as evidence for neuroplasticity as the changes in the volume of the posterior hippocampus (a change in the structure of the brain) is shown to be impacted by the experience in spatial navigation (the environmental demand).

Excellent links made.

You described two specific parts of neuroplasticity, but not what it is in general.

Teaching Change José Antonio Bowen, 2021-09-28 This pathbreaking book for educators shows that focusing on relationships resilience and reflection can better prepare graduates for the future Learning something new particularly something that might change your mind is much more difficult than most teachers think Because people think with their emotions and are influenced by their communities and social groups humans tend to ignore new information unless it fits their existing worldview Thus facts alone even if discussed in detail typically fail to open minds and create change In a world in need of graduates who can adapt to new information and situations we need to renew our educational commitment to

producing flexible and independent thinkers In *Teaching Change* Jos Antonio Bowen argues that education needs to be redesigned to take into account how human thinking behaviors bias and change really work Drawing on new research Bowen explores how we can create better conditions for learning that focus less on teachers and content and more on students and process He also examines student psychology history assumptions anxiety and bias and advocates for education to focus on a new 3Rs relationships resilience and reflection Finally he suggests explicit learning designs to foster the ability to think for yourself The case for a liberal by which Bowen means liberating education has never been stronger but he says it needs to be redesigned to achieve the goal of creating lifelong learners and citizens capable of divergent and independent thinking With an expansive and powerful argument *Teaching Change* combines elegant and gripping explanations of recent and wide ranging research from biology economics education and neuroscience with hundreds of practical suggestions for individual teachers

**Secret Diplomacy** Corneliu Bjola, Stuart Murray, 2016-04-14 This volume investigates secret diplomacy with the aim of understanding its role in shaping foreign policy. Recent events including covert intelligence gathering operations, accusations of spying and the leaking of sensitive government documents have demonstrated that secrecy endures as a crucial yet overlooked aspect of international diplomacy. The book brings together different research programmes and views on secret diplomacy and integrates them into a coherent analytical framework thereby filling an important gap in the literature. The aim is to stimulate, generate and direct the further development of theoretical understandings of secret diplomacy by highlighting gaps in existing bodies of knowledge. To this end the volume is structured around three distinct themes: concepts, contexts and cases. The first section elaborates on the different meanings and manifestations of the concept, the second part examines basic contexts that underpin the practice of secret diplomacy while the third section presents a series of empirical cases of particular relevance for contemporary diplomatic practice. While the fundamental conditions of diplomacy seek to overcome alienation, estrangement and separation, and are imbued with distrust and secrecy, this volume highlights that if anything secret diplomacy is a vital, if misunderstood and unfairly criticised, aspect of diplomacy. This book will be of much interest to students of diplomacy, intelligence studies, foreign policy and IR in general.

**Discover Sociology** William J. Chambliss, Daina S. Eglitis, 2016-12-02 Discover Sociology explores sociology as a discipline of curious minds with the theoretical, conceptual and empirical tools needed to understand, analyze and even change the world. Organized around the four main themes of The Sociological Imagination, Power and Inequality, Technological Transformations of Society and Globalization, every chapter in the book illuminates the social roots of diverse phenomena and institutions.

**Collective Trauma and the Armenian Genocide** Pamela Steiner, 2021-02-25 In this pathbreaking study Pamela Steiner deconstructs the psychological obstacles that have prevented peaceful settlements to longstanding issues. The book re-examines more than 100 years of destructive ethno-religious relations among Armenians, Turks and Azerbaijanis through the novel lens of collective trauma. The author argues that a focus on embedded transgenerational collective trauma is essential to achieving more trusting, productive and stable relationships in this and similar contexts. The book takes a deep dive into history, analysing the traumatic events, examining and positing how they motivated the actions of key players, both victims and perpetrators, and revealing how profoundly these traumas continue to manifest today among the three peoples, stymieing healing and inhibiting achievement of a basis for positive change. The author then proposes a bold new approach to

conflict resolution as a complement to other perspectives such as power based analyses and international human rights Addressing the psychological core of the conflict the author argues that a focus on embedded collective trauma is essential in this and similar arenas *Counseling Theories and Case Conceptualization* Stephen V. Flynn, Joshua J. Castleberry, 2023-10-30 One of the aspects of this textbook that I most appreciate is that Dr Flynn embraces action as a scholar by integrating the most relevant and impactful theoretical practices tackling developing trends such as telebehavioral health and challenging us as readers to apply complex theoretical constructs from an intersectional culturally responsive and social justice paradigm This is not a reimagining of the traditional counseling theories textbooks from 10 years ago but rather an act of evolution and engagement captured in the immediate assertion of social justice oriented theories Nicole R Hill Interim Provost and Vice President for Academic Affairs Professor Counselor Education Shippensburg University Helps future counselors apply key theoretical constructs to real world scenarios through session transcripts and detailed case conceptualizations For students enrolled in master s and advanced doctoral programs this groundbreaking textbook blends theoretical insight and practical application Woven throughout is a focus on the multiple levels of diversity intersectionality and identity that individuals embody and the skills and interventions necessary to produce positive outcomes The book is distinguished by the inclusion of Voices from the Field digital video interviews with 12 expert practitioners of leading theories These practitioners representing different contextual backgrounds and intersectional identities share their perspectives and experiences on how to best use a particular theory to help marginalized communities who have experienced discrimination All theory based chapters provide readers with case conceptualizations session transcripts and videos of Voices from the Field Additionally all chapters include learning objectives chapter summaries and student activities Within each chapter students will learn theory aligned assessment instruments that resonate with clients needs and acquire proficiency in an eclectic array of techniques derived from both classic and contemporary counseling theories The book innovatively applies techniques and skills to pressing issues such as racism discrimination and inequity through adept application of theory to empower healing and transformation Instructors will also have access to a full suite of ancillaries including an Instructor Manual Test Bank and chapter PowerPoints Key Features Mapped to the Council for the Accreditation of Counseling and Related Educational Programs CACREP 2016 and 2024 standards Examines nuances of 36 counseling theories new and emerging counseling theories and describes 24 theoretically congruent assessment instruments Includes 12 digitally recorded Voices from the Field interviews that showcase first person accounts from diverse clinicians working with marginalized communities people of color LGBTQIA clientele and other underrepresented populations Contains detailed information about the profession s unique theoretical history leaders legacies waves of philosophical and political change and practice based skills Incorporates information needed to fully understand how counseling theories make meaning of mental health issues human development and client and counselor therapeutic roles Chapters include an examination of

Albert Rorabacher,2016-09-13 The world has become obsessed with the Western notions of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India s problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co opted politicians who have turned politics into a

veritable art form as this volume comprehensively demonstrates

**Forestry Economics** John E. Wagner, 2023-12-22  
Forestry Economics introduces students and practitioners to the economics of managing forests and forest enterprises. The book adopts the approach of managerial economics textbooks and applies this to the unique problems and production processes faced by managers of forests and forest enterprises. What many future forest and natural resource managers need is to understand what economic information is and how to use it to make better business and management decisions. John E. Wagner draws on his 30 years of experience teaching and working in the field of forest resource economics to present students with an accessible understanding of the unique production processes and problems faced by forest and other natural resource managers. The second edition has been updated to include expanded discussion of compounding discounting and capital budgeting as well as an expanded discussion of when to replace a capital asset that has i costs but no direct revenue stream such as a machine ii costs and a direct annual revenue stream such as a solar array or iii costs and a periodic revenue stream illustrated by the forest rotation problem. New practical examples to provide students with applications of the concepts being discussed in the text most notably on New Zealand and a Radiata Pine *Pinus radiata* Plantation. A brand new chapter that develops business plans for for-profit businesses to illustrate how a business plan is derived from the economic information contained within the Architectural Plan for Profit and how it can be used to make business decisions about continuing to operate a business or to start a new business. This textbook is an invaluable source of clear and accessible information on forestry economics and management not only for economics students but also for students of other disciplines and those already working in forestry and natural resources.

*The Palgrave Handbook of Religion, Peacebuilding, and Development in Africa* Susan M. Kilonzo, Ezra Chitando, Joram Tarusarira, 2023-10-17  
This Handbook explores the ways in which religion among the African people has been applied in situations of conflict and violence to contribute to sustainable peace and development. It analyzes how peacebuilding inspired and enabled by religion serves as the foundation for sustainable development in Africa while also acknowledging that religion can also be a tool of destruction and can be used to fuel violence and underdevelopment. Contributors to this volume offer theoretical discussions from existing literature as well as experiences of practitioners to deepen the readers' understanding on the role of religion and religious institutions in peacebuilding and development in Africa. The Handbook provides reflections on possible future developments as well thereby aligning with the goals of SDG 16.
