## IBM System Storage DS3400 Express

*Cost-effective storage consolidation with a  
Fibre Channel direct-attach or SAN solution*

As a business matures, so does the amount of data and the value of the data that it holds within the organization. If the data is distributed across servers and individual storage systems, the business will face increased cost and complexity along with the accompanying business risks.

The IBM System Storage™ DS3400 Express leads the way for these organizations to take advantage of consolidating and sharing this data within a direct-attach or FC SAN solution. The DS3400 Express adds the most advanced front-end 4 Gbps FC technology to IBM time-proven designs for enterprise-class RAID storage. With FC host connectivity and SAS back-end technology, the DS3400 Express is designed to improve productivity through data consolidation, availability, performance and scalability.

### Easy to deploy and manage

The IBM System Storage DS3400 Storage Manager software is designed to provide a friendly user interface from setup to administration. This intuitive software builds on generations of IBM software development to provide trusted and reliable data management. Its task-based user interface significantly reduces the complexity of installation, configuration, and management. The DS3400 Storage Manager approach is designed to enable even non-storage savvy administrators to quickly set up and deploy their storage solution.
