Flying in the Face of Criminalization Sofia Michaelides-Mateou,Andreas Mateou,2016-04-15

Two parallel investigations take place after every aviation accident one technical one judicial The former must be conducted with the sole intention of making safety recommendations to prevent the recurrence of similar accidents The judicial investigation however has the intention of identifying those parties that have been at fault and to apportion blameworthiness for criminal and civil liability Consequently this results in a predicament for those parties that have been identified as having played a role in the accident a dilemma between not supplying information aimed at enhancing safety and preventing future accidents and on the other hand supplying such information which may possibly be used against them in subsequent criminal prosecution The situation is compounded by inconsistent approaches between different legal systems aviation professionals may find themselves faced with criminal charges in one country but not in another and they may also be unsure as to whether statements given during the technical investigation could be used against them in a court of law Aviation safety is to a large extent built upon the trust placed by pilots ATCOs and other aviation professionals in the process of accident investigation This book examines the growing trend to criminalize these same people following an accident investigation and considers the implications this has for aviation safety

AIR CRASH INVESTIGATIONS - THE DISAPPEARANCE OF MH370 - Did Captain Zaharie Ahmad Shah prevent a disaster? Dirk Jan Barreveld,2015-08-06

On 07 March 2014 at 1642 UTC a Malaysia Airlines Flight MH370 bound for Beijing departed from Kuala Lumpur International Airport with 239 persons on board It was a Boeing 777 200ER A half

hour in the flight all communication stopped suddenly and the plane changed course to the remote South Indian Ocean. Nothing was heard or seen of the plane until on 1 August 2015 a piece of the wing was found on the Beach of Reunion Island in the Southwest Indian Ocean. The accident is very similar to the crash of Helios Flight 5223 on 13 August 2005. This plane suffered from a sudden leak in the cabin pressure crew and passengers suffered from hypoxia three hours later the plane hit a mountain near Athens Greece. Did Captain Shah of MH370 try to avoid crashing on Beijing? What is the role of the huge American base of Diego Garcia in the Indian Ocean in the story?

Research Anthology on Reliability and Safety in Aviation Systems, Spacecraft, and Air Transport Management Association, Information Resources, 2020-09-24. As with other transportation methods safety issues in aircraft can result in a total loss of life. Recently the air transport industry has come under immense scrutiny after several deaths occurred due to aircraft design and airlines that allowed improperly inspected aircraft to fly. Spacecraft too have found errors in system software that could lead to catastrophic failure. It is imperative that the aviation and aerospace industries continue to revise and refine safety protocols from the construction and design of aircraft to secure and improve aviation systems and to test and inspect aircraft. The Research Anthology on Reliability and Safety in Aviation Systems, Spacecraft and Air Transport is a vital reference source that examines the latest scholarly material on the use of adaptive and assistive technologies in aviation to establish clear guidelines for the design and implementation of such technologies to better serve the needs of both military and civilian pilots. It also covers new information technology use in aviation systems to streamline the cybersecurity decision making planning and design processes within the aviation industry. Highlighting a range of topics such as air navigation systems computer simulation and airline operations this multi volume book is ideally designed for pilots scientists engineers aviation operators air traffic controllers air crash investigators teachers academicians researchers and students.

Human Factors in Aviation Eduardo Salas, Dan Maurino, 2010-01-30. Fully updated and expanded the second edition of Human Factors in Aviation serves the needs of the widespread aviation community students engineers scientists pilots managers and government personnel. Offering a comprehensive overview the volume covers topics such as pilot performance human factors in aircraft design vehicles and systems and NextGen issues. The need for an up to date scientifically rigorous overview is underscored by the frequency with which human factors crew error cause aviation accidents pervasiveness of human error in safety breakdowns. Technical and communication advances diminishing airspace and the priority of aviation safety all contribute to the generation of new human factors problems and the more extensive range of solutions. Now more than ever a solid foundation from which to begin addressing these issues is needed. New edition thoroughly updated with 50% new material offering full coverage of NextGen and other modern issues. Liberal use of case examples exposes students to real world examples of dangers and solutions. Website with study questions and image collection.
