Proceedings of the 2021 Asia-Pacific International Symposium on Aerospace Technology (APISAT 2021), Volume 2 Sangchul Lee,Cheolheui Han,Jeong-Yeol Choi,Seungkeun Kim,Jeong Ho Kim,2022-09-29 This proceeding comprises peer reviewed papers of the 2021 Asia Pacific International Symposium on Aerospace Technology APISAT 2021 held from 15 17 November 2021 in Jeju South Korea This book deals with various themes on computational fluid dynamics wind tunnel testing flow visualization UAV design flight simulation satellite attitude control aeroelasticity and control combustion analysis fuel injection cooling systems spacecraft propulsion and so forth So this book can be very helpful not only for the researchers of universities and academic institutes but also for the industry engineers who are interested in the current and future advanced topics in aerospace technology National Security, Public Health: Exceptions to Human Rights? Myriam

Feinberg,Laura Niada-Avshalom,Brigit Toebes,2017-10-02 The book deals with the complicated relationships between national security and human rights and between public health and human rights Its premise is the fact that national security and public health are both included in human rights instruments as exceptions to the human rights therein sanctioned yet they can arguably be considered as human rights themselves and be equally valuable The book therefore asks to what extent the protection of the individual could or should be overridden to enable the protection of the national security or public health of the general public Both practice and case law have shown that human rights risk being set aside when they clash with the protection of national security or public health Through theoretical analysis and practical examples the book addresses the conflicts that arise when the concepts of national security and public health are used and abused and other rights including freedom of speech procedural freedoms individual health are violated as a consequence It provides many interesting findings on the values that states are ready to protect and forego to ensure their safety which can contribute to the ongoing debate on the protection of human rights This book was originally published as a special issue of The

International Journal of Human Rights *Quality and Inequality in Regional and Urban Systems* Karima Kourtiti,Peter Nijkamp,Roger Stough,2019-11-25 In the aftermath of both ongoing globalisation with both widening and deepening effects on countries regions and cities and structural changes resulting from the 2008 economic recession regions and cities in our world are confronted with a different arena of players performances and institutions The challenges are formidable and numerous Many regions and cities seem to resort to their indigenous strength without much regard to other players in the field This has enormous consequences for the competitive behaviour and profile of regional and urban actors but has at the same time deep impacts on the distribution of wealth income and employment over and within countries regions and cities

There is indeed much evidence that disparities among regions and in cities are increasing in this new force field. This special issue of REGION makes a solid scientific attempt i) to map out the spatial consequences of recent transitions in growth trajectories of countries or regions and ii) to trace policy strategies and design effective policy information to cope adequately with these new challenges. The present special issue does so by highlighting the new force field of regional and urban dynamics from three angles in the context of spatial quality and inequality. These will be briefly sketched below.
