

ORGANISATIONAL BEHAVIOR

About the Book

Organisational Behaviour is the study and application of knowledge about how people act within organisations. It is a human tool for human benefits. It applies to the behaviour of people at work in all types of organisations: public, private, cooperative sector, commercial or service organisations. Wherever organisations are, there is a need to understand organisational behaviour. Organisational Behaviour is the study of human behaviour in organisations to make more active human performance to achieve organisational objectives as well as human objectives. Organisational Behaviour aims at finding out those ways in which people will contribute in best possible manner. The study of Organisational Behaviour involves understanding, prediction and control of human behaviour and the factors which influence the performance of people in an organisation. It is concerned with the behaviour of individuals and groups not the behaviour of all members collectively. Although there exist scores of titles on organisational behaviour most of them are too specific or too elaborate to cater the need of students from disciplines other than management. The present book has made an earnest effort to present the complex, multi-level concept of organisational behaviour in a simple and lucid manner so that it is easily understandable to the general students even if they are from some other disciplines. This book specifically covers the curricula of BCA, BBA of universities like MAKAUT, University of Calcutta and a number of other universities of the country.
