Rescuing Econometrics Duo Qin,2023-12-01 Haavelmo's 1944 monograph The Probability Approach in Econometrics is widely acclaimed as the manifesto of econometrics This book challenges Haavelmo's probability approach shows how its use is delivering defective and inefficient results and argues for a paradigm shift in econometrics towards a full embrace of machine learning with its attendant benefits Machine learning has only come into existence over recent decades whereas the universally accepted and current form of econometrics has developed over the past century A comparison between the two is however striking The practical achievements of machine learning significantly outshine those of econometrics confirming the presence of widespread inefficiencies in current econometric research The relative efficiency of machine learning is based on its theoretical foundation and particularly on the notion of Probably Approximately Correct PAC learning Careful examination reveals that PAC learning theory delivers the goals of applied economic modelling research far better than Haavelmo's probability approach Econometrics should therefore renounce its outdated foundation and rebuild itself upon PAC learning theory so as to unleash its pent up research potential The book is catered for applied economists econometricians economists specialising in the history and methodology of economics advanced students philosophers of social sciences

Modern Econometric Analysis Olaf Hübner,Joachim Frohn,2007-04-29 In this book leading German econometricians in different fields present survey articles of the most important new methods in econometrics The book gives an overview of the field and it shows progress made in recent years and remaining problems

Advances in Econometrics and Modelling B.

Raj,2013-03-09 During 1985-86 the acquisition editor for the humanities and social sciences division of Kluwer Academic Publishers in the Netherlands visited the University of Florida where I was also visiting while on sabbatical leave from Wilfrid Laurier University as the McKethan Matherly Senior Research Fellow to discuss publishing plans of the faculty He expressed a keen interest in publishing the proceedings of the conference of the Canadian Econometric Study Group CESG that was to be held the following year at WLU This volume is the end product of his interest endurance and persistence But for his

persistence I would have given up on the project. Most of the papers though not all included in this volume are based on presentations at CESG conferences. In some cases scholars were invited to contribute to this volume where their research complimented those presented at these conferences even though they were not conference participants. Since papers selected for presentation at the CESG conferences are generally the finished product of scholarly research and often under submission to refereed journals it was not possible to publish the conference proceedings in their entirety. Accordingly it was decided in consultation with the publisher to invite a select list of authors to submit significant extensions of the papers they presented at the CESG conferences for inclusion in this volume. The editor wishes to express gratitude to all those authors who submitted their papers for evaluation by anonymous referees and for making revisions to conform to our editorial process.

Unit Root Tests in Time Series Volume 2 K. Patterson, 2012-07-05 Testing for a Unit Root is now an essential part of time series analysis but the literature on the topic is so large that knowing where to start is difficult even for the specialist. This book provides a way into the techniques of unit root testing explaining the pitfalls and nonstandard cases using practical examples and simulation analysis.
