Viehberg,Maik Veste,2024-01-05 This open access book about the sustainability of marine and terrestrial ecosystems in southern Africa provides a synthesis of the research program Science Partnerships for the Adaptation to Complex Earth System Processes SPACES II 2018 2022 It addresses the scientific social and economic issues related to climate change its potential impacts on the various ecosystems adaptations and management interventions for enhancing systems resilience in Southern Africa It is written by numerous scientists from African states and Germany and summarizes the latest research findings which are of great relevance for a better understanding of climate change impacts adaptations and vulnerabilities as well as for developing management options and policy options to reduce the associated risks This is crucial considering that the projected African population increase is exceptional Furthermore climate change is assumed to hit southern Africa extremely hard with a significant increase in extreme events and the frequency of severe droughts heat waves and flooding Southern Africa hosts a high variety of ecosystems which belongs to important biodiversity hotspots for unique flora and fauna The surrounding oceans form in turn

a bottle neck within the ocean's global thermohaline circulation act as a still poorly understood carbon sink and source and play an important role for fisheries as they are highly productive. Considering these important aspects the book is an important interdisciplinary contribution to the scientific literature and will find a wide readership. The book is aimed at students, teachers and scientists in the fields of terrestrial and marine ecology, environmental nature and landscape planning, agriculture, environmental and resource management, biodiversity and nature conservation as well as scientists and representatives in specialised authorities and associations, nature conservationists and policy makers of related disciplines.

Whitaker's Cumulative Book List, 1975 Fire on Earth Andrew C. Scott, David M. J. S. Bowman, William J.

Bond, Stephen J. Pyne, Martin E. Alexander, 2013-10-31 Earth is the only planet known to have fire. The reason is both simple and profound: fire exists because Earth is the only planet to possess life as we know it. Fire is an expression of life on Earth and an index of life's history. Few processes are as integral, unique or ancient. Fire on Earth puts fire in its rightful place as an integral part of the study of geology, biology, human history, physics and global chemistry. Fire is ubiquitous in various forms throughout Earth and belongs as part of formal inquiries about our world. In recent years, fire literature has multiplied exponentially: dedicated journals exist and half a dozen international conferences are held annually. A host of formal sciences or programs announcing interdisciplinary intentions are willing to consider fire. Wildfire also appears routinely in media reporting. This full colour text containing over 250 illustrations of fire in all contexts is designed to provide a synthesis of contemporary thinking, bringing together the most powerful concepts and disciplinary voices to examine in an international setting why planetary fire exists, how it works and why it looks the way it does today. Students, lecturers, researchers and professionals interested in the physical, ecological and historical characteristics of fire will find this book and accompanying web-based material essential reading for undergraduate and postgraduate courses in all related disciplines for general interest and for providing an interdisciplinary foundation for further study. A comprehensive approach to the history, behaviour and ecological effects of fire on earth. Timely introduction to this important subject with relevance for global climate change, biodiversity loss and the evolution of human culture. Provides a foundation for the interdisciplinary field of Fire Research. Authored by an international team of leading experts in the field. Associated website provides additional resources.
