An Introduction to Philosophy of Education Robin Barrow, Ronald Woods, 2006-09-27 This introductory text now in its fourth edition is a classic in its field It shows first and foremost the importance of philosophy in educational debate and as a background to any practical activity such as teaching What is involved in the idea of educating a person or the idea of educational success What are the criteria for establishing the optimum balance between formal and informal teaching techniques How trustworthy is educational research In addition to these questions which strike to the heart of the rationale for the educative process as a whole the authors explore such concepts as culture creativity autonomy indoctrination needs interests and learning by discovery In this new updated edition the authors draw on the latest research in genetics to argue that education is uniquely human and is essentially what develops us as humans Resisting modern tendencies to equate knowledge with opinion and value judgements with taste this book leads the reader into the business of philosophising and champions the cause of reason in education

Language Matters Timothy Reagan, 2009-04-01 This book addresses a timely and very important topic language in education Language apparently is a very tricky business On the one hand everyone uses language and virtually everyone has strong views about language In the educational domain this seems to be especially true Language is not merely an intrinsic component of the educational process as the medium of instruction in the classroom but also serves as the mediator of social reality for students and teachers alike It plays a central role in articulating and conveying not only social cultural and empirical ideas but ideological concepts as well It is also used to make judgments about the speaker not to mention its role in maintaining differential power relations And yet in spite of this the role of language is not sufficiently recognized in classroom practice much of the time Nor is language except in fairly narrow

ways really an especially central part of the curriculum in spite of its incredible importance To be sure we do spend a great deal of time and money attempting to teach students to read and write that is to provide them with basic literacy skills and we provide nominal support for foreign language education programs We also provide limited support for children coming to school who do not speak English What we do not do though is to recognize the absolute centrality of language knowledge and language use for the educated person This book seeks to address these issues from the broad perspective of critical pedagogy Hearings United States. Integrating Faith and Special Education Bennett Nworie,2016-10-10 There is an inherent connection between the Christian faith and special education For example both focus on the worth of the individual Both also focus on fairness and on caring for or helping the weak Similarly both aim to equip and support others This book helps the readers perceive this integral relationship that exists between the Christian faith and the special education discipline This book utilizes the chapters that stem from real life professional experiences and scholarship of the contributors to model and encourage special education practice from a Christian faith angle It is our view that special education practiced from this faith perspective will transform what is currently accepted as best practice into a new system of special education experience that is wholesome biblically based and characteristic of Shalom as wholeness not just peace Shalom in this sense has strong relevance in both the Christian faith and special education The first three chapters highlight the connection between special education and Christian theology and draw attention to the pivotal role worldview plays in being an effective special educator The bulk of the body of the text looks at different aspects of instructional effectiveness in special education from a Christian faith perspective
