edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Educational Review ,1901 Educational Review Nicholas Murray Butler, Frank Pierrepont Marcos Novak Graves, 1901 Vols 19 34 include Bibliography of education for 1899 1906 compiled by James I Wyer and others Who's who The Fourth Dimension Simply Explained Henry Parker Manning, 1910 Among North American Authors, 1921 **Education Outlook** .1900 The Educational Times, and Journal of the College of Educational Times ,1901 Preceptors, 1901 Geometry of Four Dimensions Henry Parker Manning, 1914 Introductory Non-euclidean Geometry Henry Parker Manning, 1901 The Fifth Postulate Jason Socrates Bardi, 2008-12-01 The great discovery that no one wanted to make It s the dawn of the Industrial Revolution and Euclidean geometry has been profoundly influential for centuries One mystery remains however Euclid's fifth postulate has eluded for two thousand years all attempts to prove it What happens when three nineteenth century mathematicians realize that there is no way to prove the fifth postulate and that it ought to be discarded along with everything they doome to know about geometry Jason Socrates Bardi shares the dramatic story of the moment when the tangible and easily understood world we live in gave way to the strange mind blowing world of relativity curved space time and more Jason Socrates Bardi tells the story of the discovery of non Euclidian geometry one of the greatest intellectual advances of all time with tremendous clarity and verve I loved this book John Horgan author The End of Science and Rational Mysticism An accessible and engrossing blend of micro biography history and mathematics woven together to reveal a blockbuster discovery David Wolman author of Righting the Mother Tongue and A Left Hand Turn around the World Classified Catalogue of the Carnegie Library of Pittsburgh Carnegie Library of Pittsburgh, 1920
