Introductory Statistics is designed for

the one semester introduction to statistics course and is geared toward students majoring in fields other than math or

engineering This text assumes students have been exposed to intermediate algebra and it focuses on the applications of

statistical knowledge rather than the theory behind it The foundation of this textbook is Collaborative Statistics by Barbara

Illowsky and Susan Dean Additional topics examples and ample opportunities for practice have been added to each chapter

The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in

teaching this course These choices led to innovations in art terminology and practical applications all with a goal of

increasing relevance and accessibility for students We strove to make the discipline meaningful so that students can draw

from it a working knowledge that will enrich their future studies and help them make sense of the world around them
