Libby,Victor Zakkay,1962 A theoretical and experimental investigation of mixing and supersonic combustion is presented A review of the problem under investigation is given Then an analysis of inviscid flow fields with a finite rate chemistry for a hydrogen air reaction is presented an an analysis of a turbulent mixing for flows with large density gradients with no chemical reaction is presented The analysis is compared wit the experimental results Results of the experiments in upersonic combustion are presented Author **Shock-tube Diagnostics Utilizing Laser Raman Spectroscopy** Anthony A. Boiarski,1975 The laser Raman scattering technique shows potential as a diagnostic method for determining the chemical and thermodynamic state of high temperature gases To investigate the utility of this technique for shock tube diagnostics and to validate the method at known elevated temperatures vibrational Raman intensities were measured behind an incident shock wave Intensity history data through the wave front vibrational excitation times of oxygen in air along with temperature and density measurements for oxygen and nitrogen in air were obtained over a range of postshock conditions The measured densities and temperatures were found to be in good agreement with shock wave theory An excitation time measurement also agreed well with shock tube data obtained with other diagnostic methods In general the results indicated that the Raman scattering technique was accurate at elevated temperatures and should prove useful in determining the thermochemical state of gases in continuous flows as well as in shock tubes and other impulse facilities **Energy Research Abstracts** ,1993 Semiannual with semiannual and annual indexes References to all scientific and technical literature coming from DOE its laboratories energy centers and contractors Includes all works deriving from DOE other related government sponsored information and foreign nonnuclear information Arranged under 39 categories e g Biomedical sciences basic studies Biomedical sciences applied studies Health and safety and Fusion energy Entry gives bibliographical information and abstract Corporate author subject report number indexes *Fossil Energy Update* ,1984 *Hydrogeology* Bernward Hölting,Wilhelm G.
