Strengths-Based Teaching and Learning in Mathematics Beth McCord Kobett, Karen S. Karp, 2020-02-27 This book is a game changer Strengths Based Teaching and Learning in Mathematics 5 Teaching Turnarounds for Grades K 6 goes beyond simply providing information by sharing a pathway for changing practice Focusing on our students strengths should be routine and can be lost in the day to day teaching demands A teacher using these approaches can change the trajectory of students lives forever All teachers need this resource Connie S Schrock Emporia State University National Council of Supervisors of Mathematics President 2017 2019 NEW COVID RESOURCES ADDED A Parent s Toolkit to Strengths Based Learning in Math is now available on the book s companion website to support families engaged in math learning at home This toolkit provides a variety of home based activities and games for families to engage in together Your game plan for unlocking mathematics by focusing on students strengths We often evaluate student thinking and their work from a deficit point of view particularly in mathematics where many teachers have been taught that their role is to diagnose and eradicate students misconceptions But

what if instead of focusing on what students don't know or haven't mastered we identify their mathematical strengths and build next instructional steps on students' points of power Beth McCord Kobett and Karen S Karp answer this question and others by highlighting five key teaching turnarounds for improving students' mathematics learning identify teaching strengths discover and leverage students' strengths design instruction from a strengths-based perspective help students identify their points of power and promote strengths in the school community and at home Each chapter provides opportunities to stop and consider current practice reflect and transfer practice while also sharing Downloadable resources activities and tools Examples of student work within Grades K-6 Real teachers' notes and reflections for discussion It's time to turn around our approach to mathematics instruction end deficit thinking and nurture each student's mathematical strengths by emphasizing what makes them each unique and powerful **Doctoral Education and the Faculty of the Future** Ronald G.

Ehrenberg, Charlotte V. Kuh, 2011-05-02 American colleges and universities simultaneously face large numbers of faculty retirements and expanding enrollments Budget constraints have led colleges and universities to substitute part-time and full-time non-tenure track faculty for tenure track faculty and the demand for faculty members will likely be high in the decade ahead This heightened demand is coming at a time when the share of American college graduates who go on for PhD study is far below its historic high The declining interest of American students in doctoral programs is due to many factors including long completion times low completion rates the high cost of doctoral education and the decline in the share of faculty positions that are tenured or on the tenure track In short doctoral education is in crisis because the impediments are many and the rewards are few students often choose instead to enroll in professional programs that result in more marketable credentials In *Doctoral Education and the Faculty of the Future* scientists social scientists academic administrators and policy makers describe their efforts to increase and improve the supply of future faculty They cover topics ranging from increasing undergraduate interest in doctoral study to improving the doctoral experience and the participation of underrepresented groups in doctoral education Bringing Math Students Into the Formative Assessment Equation Susan
