Motherboard Battery

A battery compartment, which stores the battery used for storing data such as system date and time, when you shut down your system.

Chip set

A chip that regulates traffic on the system. There are 2 types of chipsets with different functions from each other. North bridge chip set is between the processor and memory slots. This is the chip set and processor memory modules can work together (the data traffic between the CPU and RAM). South Bridge-chip set is located at the bottom. When the bottom of the transformer or in the slot for graphics cards. Chip-Set for the management of traffic flow on the graphics card, hard drives and other devices using the motherboard.

USB (Universal Serial Bus) Port

There are many of these ports across the back panel. They are used for connecting external devices like USB flash drives, external hard disks, iPods, MP3 players and cameras. Every computer has at least 2 such ports, and more of them are always welcome.
