Invisible Forces Pei Pei Liu,2023-12-01 Explores the

critical role that classroom educators play in supporting student motivation throughout the transition from high school to college. Educators consistently identify student motivation as a top concern particularly during the transition to college but often feel helpless to influence it. Some assume that students are simply motivated or not. Others are daunted by trying to shape an unobservable psychological phenomenon. *Invisible Forces* provides a framework for thinking of student motivation as a set of internal mindsets that are promoted or thwarted through a complex ecology of personal, classroom, institutional, and systemic factors. Using the method of portraiture, Pei Pei Liu brings this ecology to life. The book presents a series of four rich case studies of educators' efforts to support student motivation and the challenges they encounter in secondary and postsecondary writing classrooms. Attuned to the unique status of writing-based courses as a near-universal academic experience throughout the transition from high school to college, these portraits shed light on different strategies, make a case for institutional support of instructors, and pave the way for greater alignment between secondary and postsecondary settings.

International Handbook of Psychology Learning and Teaching Joerg Zumbach, Douglas A. Bernstein, Susanne Narciss, Giuseppina Marsico, 2022-12-16. The *International Handbook of Psychology Learning and Teaching* is a reference work for psychology learning and teaching worldwide that takes a multi-faceted approach and includes national, international, and intercultural perspectives. Whether readers are interested in the basics of how and what to teach in training psychology teachers, in taking steps to improve their own teaching, or in planning or implementing research on psychology learning and teaching, this handbook will provide an excellent place to start. Chapters address ideas, issues, and innovations in the teaching of all psychology courses, whether offered in psychology programs or as part of curricula in other disciplines. The book also presents reviews of relevant literature and best practices related to everything from the basics of course organization to the use of teaching technology. Three major sections, each consisting of several chapters, address Teaching Psychology in Tertiary Higher Education, Psychology Learning and Teaching for All Audiences, and General Educational and Instructional Approaches to Psychology Learning and Teaching.

Psychology and Education Diahann Gallard, Katherine M. Cartmell, 2014-11-20. There are a number of psychological themes which are key to really understanding education, for example, the internal processes of learners, the nature of learning in culture, and the influences on teaching and learning. Written specifically for education studies students, *Psychology and Education* is an accessible text that offers a clear introduction to educational psychology on education studies programmes. It considers the key psychological ideas that will support students' understanding of how different individuals and groups of individuals learn and behave in educational contexts and settings. Looking at factors that influence learning and attainment, the book discusses themes such as the relationship between cognition and emotion, emotional intelligence, and motivation. Throughout, the emphasis is on encouraging the reader to avoid stereotyping, attributions, and rigid views of learner ability. Features include a focus on only the most relevant psychological themes, case studies to exemplify key points, extended research tasks, reflection points. Part of

the Foundations of Education Studies series this timely textbook is essential reading for students coming to the study of educational psychology for the first time It will ensure that undergraduate students are confident and competent with core psychological ideas related to education and help them to understand how different individuals learn and behave in educational contexts and settings *Communication and Technology* Lorenzo Cantoni, James A. Danowski, 2015-08-31 The primary goal of the Communication and Technology volume 5th within the series Handbooks of Communication Science is to provide the reader with a comprehensive compilation of key scholarly literature identifying theoretical issues emerging concepts current research specialized methods and directions for future investigations The internet and web have become the backbone of many new communication technologies often transforming older communication media through digitization to make them compatible with the net Accordingly this volume focuses on internet web technologies The essays cover various infrastructure technologies ranging from different kinds of hard wired elements to a range of wireless technologies such as WiFi mobile telephony and satellite technologies Audio visual communication is discussed with reference to large format motion pictures medium sized television and video formats and the small screen mobile smartphone There is also coverage of audio only media such as radio music and voice telephony text media in such venues as online newspapers blogs discussion forums and mobile texting and multi media technologies such as games and virtual reality
