Life Cycle of Clusters in Designing Smart Specialization Policies Giuseppe Pronești, 2018-11-30. This book investigates cluster life cycle (CLC) analysis to inform the entrepreneurial discovery process (EDP) in order to support the effectiveness of the smart specialization strategy (S3). It focuses on the evolutionary analysis of clusters' development stages: emergence, development, maturity, decline, transformation, highlighting how different phases of the CLC have a different role in informing S3 policy making and identifying regions' potentials to specialize. In so doing, it offers an original conceptual model that explains what information can be provided by CLC analysis in the effective design and implementation of S3 and EDP, systematizes clusters' stage specific features, and unveils the role played by each CLC stage. It contributes to the emerging academic debate on the role of the CLC concept in policy making by highlighting the importance of CLC analysis in dynamically investigating regional contexts and tailoring development policies such as S3. The book is an invaluable resource for academics and regional policy makers, providing them with guidance and recommendations on how to effectively approach the design and implementation of S3 and EDP by fully tapping the potential of CLC analysis.

Understanding the Entrepreneurial Mind Alan L. Carsrud, Malin Brännback, 2009-07-30 Interest in the functioning of the human mind can certainly be traced to Plato and Aristotle who often dealt with issues of perceptions and motivations While the Greeks may have contemplated the human condition the modern study of the human mind can be traced back to Sigmund Freud 1900 and the psychoanalytic movement He began the exploration of both conscious and unconscious factors

that propelled humans to engage in a variety of behaviors While Freud's focus may have been on repressed sexuality our focus in this volume lies elsewhere We are concerned herein with the expression of the cognitions motivations passions intentions perceptions and emotions associated with entrepreneurial behaviors We are attempting in this volume to expand on the work of why entrepreneurs think differently from other people Baron 1998 2004 During the decade of the 1990s the field of entrepreneurship research seemingly abandoned the study of the entrepreneur This was the result of earlier research not being able to demonstrate some unique entrepreneurial personality trait or characteristic Brockhaus and Horwitz 1986 It was both a naive and simplistic search for the holy grail of what made entrepreneurs the way they are However many of the researchers in this volume have never gave up the belief that a better understanding of the mind of the entrepreneur would give us a better understanding of the processes that lead to the creation of new ventures
