

## Ambient colours

## Observation

Wall: Yellow  
White light: Warm white

Wall: Red  
Coloured light: Magenta

Wall: White  
Coloured light: Amber

Wall: Yellow  
Coloured light: Sky blue

White light that is reflected by a coloured surface takes on the colour of the surface and becomes the predominant colour of light for the whole room. When lighting a coloured wall with coloured light, this effect can be increased, reversed or inverted.

## Conclusion

The colour of light in a room is influenced by the decoration of the room. In comparison to diffuse light, direct light increases the effect of the light when illuminating a coloured surface. The effect of a body colour can be intensified by using coloured light of a similar colour. Strong colour contrasts appear brighter for the same illuminance than a weaker colour contrast. Lesser colour contrasts can be perceived better

under brighter lighting. Within closed rooms the effect is hardly perceptible due to the phenomenon of colour constancy.

## Applications

In practice, when illuminating coloured surfaces, it is recommended that lighting tests or calculations be carried out.

Coloured accent lighting is used for:

- exhibitions
- trade-fair stands
- sales areas
