Meb For Mortals Meb Keflezighi, Scott Douglas, 2015-04-07 With his historic win at the 2014 Boston Marathon Meb Keflezighi cemented his legacy as one of the great champions of long distance running. Runners everywhere wanted to know how someone two weeks away from his 39th birthday who had only the 15th best time going into the race could defeat the best field in Boston Marathon history and become the first American man to win the race in 31 years. *Meb For Mortals* describes in unprecedented detail how three time Olympian Keflezighi prepares to take on the best runners in the world. More important, the book shows everyday runners how to implement the training, nutritional, and mental principles that have guided him throughout his long career, which in addition to a 2014 Boston Marathon win includes an Olympic silver medal and the 2009 New York City Marathon title.

Runner's World: Your Best Stride Jonathan Beverly, 2017-06-13 Run the Way You Were Born to Run. Every runner wants a smooth, light, powerful, and resilient stride. But there isn't one ideal form; all runners should try to emulate. Instead, research and experience show that people can run effectively in a wide variety of patterns with some universal elements. In lively, accessible prose, author Jonathan Beverly details his search for common ground among physical therapists, podiatrists, biomechanics researchers, and coaches, and reveals how individual runners can apply those principles and improve their performance, avoid injury, and enhance their enjoyment on the run. With specific illustrated exercises that show how to counteract tight muscles from excessive sitting, improve limited arm mobility from hunching over electronic devices, strengthen your feet for better balance, and improve speed by lengthening your stride, *Runner's World: Your Best Stride* is an approachable guide to human movement and a practical tool for improved running performance.

The Running Athlete Gian Luigi Canata, Henrique Jones, Werner Krutsch, Patricia Thoreux, Alberto Vascellari, 2022-04-22 This book explores running in a broad range of sport disciplines, providing a full spectrum coverage on this extremely important and commonly diffused activity. The volume opens with basic information such as biomechanics, physiology, training principles, nutrition, and then presents discipline-specific aspects of running in several individual and team sports. Each chapter is structured organically to offer a uniform and thorough information. For each sport, the authors examine biomechanical, physiological, and training specificities, as well as injury epidemiology and preventive measures. Filling a gap in literature, this book appeals not only to sports physicians, orthopaedic surgeons, trainers, coaches, fellows, and researchers, but also to athletes in the various disciplines. Written in collaboration with ESSKA, it provides a useful toolkit to those readers interested in the state of the art update on the running athlete.
