**ISCCM Manual of RRT and ECMO in ICU** Rajesh Chandra Mishra, Kanwalpreet Sodhi, KC Prakash, Poonam Malhotra Kapoor, 2020-02-28     Hemodiafiltration Menso J. Nubé, Muriel P.C. Grooteman, Peter J. Blankestijn, 2015-11-10 This book gives a complete description of online hemodiafiltration in five sections. It is unique in the systematic and complete way in which hemodiafiltration is described. Each chapter is completed by a point to point summary of essential information in a separate text box. Part of the book is dedicated to the theoretical background of convective clearance. In this part safety issues and quality control is reviewed especially on the quality of water for dialysis and substitution fluid as well as equipment both dialyzers and machines with which this treatment can be performed. As recently the results of several randomized controlled trials were available the effect of hemodiafiltration on hard clinical end points mortality and morbidity is discussed in detail. This has not been done before as the most recent book/journal on hemodiafiltration was published in 2011 before the results of the 3 randomized controlled trials were published. Furthermore the methodological quality of the trials is discussed by an expert in order to help the readers in their judgment of the trials. Part of the book concentrates on the effect of the treatment on several biomarkers and uremic toxins. Several clinically relevant issues are discussed separately such as the prescription of anticoagulation during the treatment, drug prescription and clearance for patients treated with hemodiafiltration and hemodynamic stability. Finally a practical guide on how to perform the treatment is provided. In this unique section seemingly simple but important details of hemodiafiltration treatment are discussed such as the importance of needle size for blood flow rates, the difference between filtration fraction and substitution ratio, the different targets that can be set and how to reach them. As most literature is mainly focused on theoretical issues this unique feature really will help the field to perform hemodiafiltration and answer practical questions.     **Pediatric Dialysis** Bradley A. Warady, Steven R. Alexander, Franz Schaefer, 2021-03-30 The optimal management of children who receive dialysis therapy requires a thorough understanding of the multidisciplinary nature of their treatment. The multiple organ systems that are often impacted by acute and chronic impairment of kidney function makes the care of this patient population highly complex. This 3rd edition of Pediatric Dialysis provides authoritative and comprehensive information on all aspects of dialysis related care for children to assist the clinician in achieving the best possible patient outcomes. Like the two preceding editions the 3rd edition enlists experts from North America, South America, Europe and Asia to provide their perspectives on virtually all issues pertaining to dialysis related management for children based on years of clinical and research experience. The book contains sections on all essential topics including when to initiate dialysis, peritoneal dialysis, hemodialysis, managing secondary complications, nutritional therapy, drugs and dialysis outcomes and transition to adult care. Each chapter has been thoroughly updated in terms of content and references. The book also includes several new chapters on topics such as remote patient monitoring, acute kidney injury management in the developing world and antibiotic stewardship in the dialysis unit.

maintaining the text's preeminent status as a worldwide source for pediatric dialysis care      **On-Line Hemodiafiltration:**

**The Journey and the Vision** G. Krick, C. Ronco, 2011-12-20 On line HDF represents a major technical development in the delivery of hemodialysis therapy. It combines the properties of increased diffusion available in current high flux membranes with convective removal of between 6 and 30 liters per treatment and requires the use of ultrapure water and online filtration of replacement fluid. On line HDF has been successfully introduced in Europe and Asia and is routinely prescribed for dialysis patients in these regions. The book at hand summarizes the history and achievements of on line HDF in four parts. A report of the technological development in both machine and fiber dialyzer is followed by a description of the challenges encountered in the evolution of on line HDF collecting the accounts of clinical key opinion leaders who had been involved in its early application. The third part presents a comprehensive review of the clinical results achieved with on line HDF from its inception to the present times in which it represents the clinical golden standard. The fourth and final part is dedicated to on line HDF as a vision for the future.      *Critical Care Nephrology and Renal Replacement Therapy in Children* Akash
