experiments making use of the new technologies available data collection and analysis systems by computers Internet video commercial electronics smartphones etc while highlighting the methodological aspects of physics and science in general The projects are aimed at university students of science and engineering although some may be used in high schools The experiments would enable students to answer the questions How do we know this Why do we believe in that These questions illustrate the nature of scientific thinking process This book is complemented by the site www.fisicarecreativa.com where several of the projects presented here were carried out by students from different universities We hope it can be used as an innovative STEM learning tools

Relativistic Quantum-Classical Frontiers Luis Grave de Peralta, 2025-10-13 The author of this monograph proposes a simple correction for the relativistic quantum mechanics estimate of the energy density of the vacuum The quantum mechanics vacuum has energy therefore it has a mass associated with it If we consider the quantum vacuum a quantum object with mass then we could extrapolate to the vacuum the results obtained previously for any free quantum object with mass i.e. the mass of the quantum vacuum must be smaller than the Planck mass The vacuum is not a quantum vacuum but a classical vacuum when its mass surpasses the Planck mass There is nothing in the classical vacuum This explains the extremely low observational value of the dark energy density Assuming that the energy of the quantum vacuum is the nature of dark energy and using the observational value of it we obtain 1000 km as a crude estimate of the maximum radius of the quantum vacuum

Fundamentals of Physics David Halliday, Robert Resnick, Jearl Walker, 2004-06-01 No other book on the market today can match the 30 year success of Halliday Resnick and Walker's *Fundamentals of Physics* In a breezy easy to understand style the book offers a solid understanding of fundamental physics concepts and helps readers apply this conceptual understanding to quantitative problem solving This book offers a unique combination of authoritative content and stimulating applications

Numerical Methods for the Life Scientist Heino Prinz, 2011-08-06 Enzyme kinetics binding kinetics and pharmacological dose response curves are currently analyzed by a few standard methods Some of these like Michaelis-Menten enzyme kinetics use plausible approximations others like Hill equations for dose response curves are outdated Calculating realistic reaction schemes requires numerical mathematical routines which usually are not covered in the curricula of life science This textbook will give a step by step introduction to numerical solutions of non linear and differential equations It will be accompanied with a set of programs to calculate any reaction scheme on any personal computer Typical examples from analytical biochemistry and pharmacology can be used as versatile templates When a reaction scheme is applied for data fitting the resulting parameters may not be unique

Correlation of parameters will be discussed and simplification strategies will be offered

Fundamentals of Estuarine Physical Oceanography Luiz Bruner de Miranda, Fernando Pinheiro Andutta, Björn Kjerfve, Belmiro Mendes de Castro
