Bennett, 2021-10-25 This book addresses the contending views of the uses of Solomon Island forest Ranging from an examination of the interaction between the first settlers and their forest the book goes on to analyse the attitudes of the British administrators planters and missionaries The colonial government sought to protect the resource but neglected to consider the wishes of the forest s inhabitants in planning for its future economic use The independent governments failed to protect the dwindling forest on customary land in the face of accelerating demands from their own people and of Asian based logging companies while non governmental organisations and aid donors have tried to invoke a more conservative regime of forest use *Transnational Asia Pacific* Shirley Lim, Larry E. Edmond, 1997-11-20 This book examines how the South Pacific was represented by explorers missionaries travellers writers and artists between 1767 and 1914 by drawing on history literature art history and anthropology Edmond engages with colonial texts and postcolonial theory criticising both for their failure to acknowledge the historical specificity of colonial discourses and cultural encounters and for continuing to see indigenous cultures in essentially passive or reactive terms The book offers a detailed and grounded reading back of these colonial discourses into the metropolitan centres which gave rise to them while resisting the idea that all representations of other cultures are merely self representations Among its themes are the persistent myth making around the figure of Cook the western obsession with Polynesian sexuality tattooing

Barrow,1998-03-12 Are there some things we can never think or know let alone do In this fascinating book acclaimed author John Barrow reveals the often paradoxical limits on knowledge and achievement and shows that the notion of impossibility has played and continues to play a striking role in our thinking and in the way in which we understand the universe and ourselves What are the true limits of science and human endeavour The end of each century leads to a stocktaking of human achievement and our expectation about the future This new book by John D Barrow looks at what limits there might be to human discovery and what we might find ultimately to be unknowable undoable or unthinkable Weaving together a tapestry of surprises Barrow explores the frontiers of knowledge taking in surrealism impossible figures time travel paradoxes of logic and perspective theological speculations about Beings for whom nothing is impossible all stimulate us to contemplate something more than what is With sufficient time and money at our disposal why should we find anything impossible Barrow

explores the limits that may be imposed upon a full understanding of the physical Universe by constraints of technology computes cost and complexity He considers how the nature of the universe s structure prevents us from answering the deepest questions about its beginning its structure and its future And he delves into the deep limits imposed by the nature of knowledge itself which have profound implications for any quest for complete knowledge They take us into the debates over the problems of free will and consciousness G ouml del s famous theorem about our inability to capture the truths of mathematics by rules and axioms is explored to see if it has any implications for science Clearly and engagingly written and using simple explanations this book reveals that impossibility is a deep and powerful notion that any Universe complex enough to contain conscious beings will contain limits on what those beings can know about their Universe that what we cannot know defines reality as surely as what we can know Impossibility is a two edged sword it threatens the completeness of the scientific enterprise yet without it there would be no laws of Nature no science and no scientists In this illuminating well written account of Limits with capital L John D Barrow chronicles and explains the limits of science as a reality generation mechanism and why it matters So for about as good an account as you re going to get of where science stops read this book It won t tell you any final answer But the journey is far more interesting and important than the destination Nature
