Happy Money Elizabeth Dunn, Michael Norton, 2013-05-14

If you think money can't buy happiness you're not spending it right

Two rising stars in behavioral science explain how money can buy happiness if you follow five core principles of smarter spending

If you think money can't buy happiness you're not spending it right

Two rising stars in behavioral science explain how money can buy happiness if you follow five core principles of smarter spending

Happy Money offers a tour of new research on the science of spending

Most people recognize that they need professional advice on how to earn, save and invest their money

When it comes to spending that money, most people just follow their intuitions

But scientific research shows that those intuitions are often wrong

Happy Money explains why you can get more happiness for your money by following five principles from choosing experiences over stuff to spending money on others

And the five principles can be used not only by individuals but by companies seeking to create happier employees and provide happier products to their customers

Elizabeth Dunn and Michael Norton show how companies from Google to Pepsi to Crate Barrel have put these ideas into action

Along the way the authors describe new research that reveals that luxury cars often provide no more pleasure than economy models that commercials can actually enhance the enjoyment of watching television and that residents of many cities frequently miss out on inexpensive pleasures in their hometowns

By the end of this book readers will ask themselves one simple question whenever they reach for their wallets: Am I getting the biggest happiness bang for my buck?

Technology-Enhanced Human Interaction in Modern Society
