*The Circulatory System* Susan Whittemore, 2009 Discusses what the circulatory system is, how it works and how it responds to exercise and hemorrhage. Fundamentals of Medicine for Biomedical Engineering

Hamid Hosseinzadeh, 2025-07-20 This concise book explains the basics of medicine in simple language for biomedical engineering students. The core medical topics covered include terminology, anatomy, histology and physiology. The book highlights the engineering aspects of basic medicine and conveys the key information biomedical engineers need to know about the human body, avoiding technical medical language. There are many engineering discussions in the book connecting basic medicine to the key components of biomedical engineering. This is an essential textbook for all biomedical engineering students and students in other engineering disciplines who require medical knowledge.

**Eternal Designs** Dr. Octavian Caius Obeada, The book explores Biblical creation narratives portraying humanity as reflections of the divine and juxtaposes these with scientific theories such as the Big Bang and the emergence of life from primordial conditions. It delves into the Last Universal Common Ancestor (LUCA) concept. It examines various scientific theories on life's origins and the complexities and functions of prokaryotic and eukaryotic cells. The narrative also highlights the mathematical elegance in human anatomy such as the Golden Ratio and Fibonacci sequences. It investigates the systems that maintain human balance and the marvels of brain functions. Throughout the book, I weave together a tapestry of scientific knowledge and theological inquiry. From the cellular foundations that play vital roles in natural ecosystems to the brain's remarkable capacities for memory and healing, the book presents a holistic view of life's complexity and beauty. It encourages readers to appreciate the harmony between scientific discovery and spiritual understanding, offering profound insights into our place in the universe and the ongoing interplay between creation and inquiry.
