that it boggled the minds of scientists for more than a century until a motley crew of modern day shark fanatics decided to try to bring the monster predator back to life In 1993 Alaskan artist and paleo fish freak Ray Troll stumbled upon the weirdest fossil he had ever seen a platter sized spiral of tightly wound shark teeth This chance encounter in the basement of the Natural History Museum of Los Angeles County sparked Troll s obsession with Helicoprion a mysterious monster shark from deep time In 2010 tattooed amateur strongman and returning Iraq War veteran Jesse Pruitt was also severely smitten by a Helicoprion fossil in a museum basement in Idaho These two bizarre shark disciples found each other and an unconventional band of collaborators grew serendipitously around them determined to solve the puzzle of the tooth whorl once and for all Helicoprion was a Paleozoic chondrichthyan about the size of a modern great white shark with a circular saw of teeth centered in its lower jaw a feature unseen in the shark world before or since For some ten million years long before

the Age of Dinosaurs Helicoprion patrolled the shallow seas around the supercontinent Pangaea as the apex predator of its time Just a few tumultuous years after Pruitt and Troll met imagination passion scientific process and state of the art technology merged into an unstoppable force that reanimated the remarkable creature and made important new discoveries In this groundbreaking book Susan Ewing reveals these revolutionary insights into what Helicoprion looked like and how the tooth whorl functioned pushing this dazzling and awe inspiring beast into the spotlight of modern science Evolution 2.0 Perry Marshall,2015-09-01 In the ongoing debate about evolution science and faith face off But the truth is both sides are right and wrong In one corner Atheists like Richard Dawkins Daniel Dennett and Jerry Coyne They insist evolution happens by blind random accident Their devout adherence to Neo Darwinism omits the latest science glossing over crucial questions and fascinating details In the other corner Intelligent Design advocates like William Dembski Stephen Meyer and Michael Behe Many defy scientific consensus maintaining that evolution is a fraud and rejecting common ancestry outright There is a third way Evolution 2 0 proves that while evolution is not a hoax neither is it random nor accidental Changes are targeted adaptive and aware You ll discover How organisms re engineer their genetic destiny in real time Amazing systems living things use to re design themselves Every cell is armed with machinery for editing its own DNA The five amazing tools organisms use to alter their genetics 70 years of scientific discoveries of which the public has heard virtually nothing Perry Marshall approached evolution with skepticism for religious reasons As an engineer he rejected the concept of organisms randomly evolving But an epiphany that DNA is code much like data in our digital age sparked a 10 year journey of in depth research into more than 70 years of under reported evolutionary science This led to a new understanding of evolution an evolution 2 0 that not only furthers technology and medicine but fuels our sense of wonder at life itself This book will open your eyes and transform your thinking about evolution and God You ll gain a deeper appreciation for our place in the universe You ll see the world around you as you ve never seen it before Evolution 2 0 pinpoints the central mystery of biology offering a multimillion dollar technology prize at naturalcode org to the first person who can solve it **Human Variation** Stephen Molnar,2015-09-04 Basic text for the sophomore junior level course in Human Variation or Human Diversity taught anthropology or biology departments This classic introduction to human variation has been thoroughly updated to include the issues and controversies facing the contemporary study of diversity Sex and Gender Heidi R.
