Creative Methods for Human Geographers Nadia von Benzon, Mark Holton, Catherine Wilkinson, Samantha Wilkinson, 2021-01-13 Introducing a broad range of innovative and creative qualitative methods this accessible book shows you how to use them in research project while providing straightforward advice on how to approach every step of the process from planning and organisation to writing up and disseminating research It offers Demonstration of creative methods using both primary or secondary data Practical guidance on overcoming common hurdles such as getting ethical clearance and conducting a risk assessment Encouragement to reflect critically on the processes involved in research The authors provide a complete toolkit for conducting research in geography while ensuring the most cutting edge methods are unthreatening to the reader *Current Geographical Publications* University of Wisconsin--Milwaukee. Library, 2003 *Current Geographical Publications* CGP is a non profit service to the scholarly community initiated in 1938 by the American Geographical Society of New York Beginning in 2006 the format changed to include the tables of contents of current geographical journals The journal titles listed link to web pages or PDF scans of the current issue s contents *Human Geography* John Rennie Short, Lisa Benton-Short, 2024-01-19 The aim of this book is to introduce students to a wide range of important and exciting work in human geography The primary audience is students in colleges and universities We decided to write this book because many of the standard texts are too big and increasingly too expensive to provide the accessible and affordable base most of us need for our human geography courses The overly large and expensive books available now have grown into to use Henry James s description of many nineteenth century novels loose and baggy monsters There is room for a more interesting and subtle book than the standard texts This briefer and more accessible alternative is written in a more familiar style that can be augmented by other resources We can use as metaphor the attempts on the big Himalayan peaks In the 1970s the attempts were increasingly organized as large teams with many climbers and elaborate systems of camps and base camps Then in the late 1970s a number of climbers dispensed with the large teams and sought to climb alone or with one other climber Less burdened by organizational weight they were much more successful in reaching the summits in quick direct assaults This book adapts a similar ethic of light and fast that affords more flexibility to instructors than a traditional textbook Not an exact metaphor to be sure but close enough to give you a sense of the book s character and mission *The Introductory Reader in Human Geography* William G. Moseley, David A. Lanegran, Kavita Pandit, 2007-05-14 A lively and stimulating companion to standard classroom texts in human geography Selections are influential in the development of the discipline or relevant to contemporary policy debates Includes a general introduction and helpful individual section introductions Systematically organized into eight sections introductory readings population and migration environment agriculture and society cultural geography and place urban geography economic geography development geography and
