Bartels,Bonnie S. LeRoy,Arthur L. Caplan,2017-07-12 Genetic counseling is fairly new The fact that the field is an accepted professional enterprise in universities clinics and hospitals throughout the United States is remarkable The contributors argue that genetics and medicine rest on beliefs widely held in American society Scientific progress is good and highly sophisticated technologies are appropriate means to solving medical problems The better understanding they gain about the nature and evolution of disease the more prepared clinicians will be to treat and prevent future occurrence of disease A belief that medicine including genetic medicine is clear factually based and objective undergirds the strategies and norms of genetic counseling This collection of original papers explores the history values and norms of that process with focus on the value of non directiveness in counseling practice The contributors examination of genetic counseling issues serves as a foundation from which to address the ethical legal and policy considerations of clinical genetics      Educators Index of Free Materials ,1997      **Genetic and Evolutionary Computing** Thi Thi Zin,Jerry Chun-Wei Lin,Jeng-Shyang Pan,Pyke Tin,Mitsuhiro Yokota,2015-09-03 This volume of Advances in Intelligent Systems and Computing contains accepted papers presented at ICGEC 2015 the 9th International Conference on Genetic and Evolutionary Computing The conference this year was technically co sponsored by Ministry of Science and Technology Myanmar University of Computer Studies Yangon University of Miyazaki in Japan Kaohsiung University of Applied Science in Taiwan Fujian University of Technology in China and VSB Technical University of Ostrava ICGEC 2015 is held from 26 28 August 2015 in Yangon Myanmar Yangon the most multiethnic and cosmopolitan city in Myanmar is the main gateway to the country Despite being the commercial capital of Myanmar Yangon is a city engulfed by its rich history and culture an integration of ancient traditions and spiritual heritage The stunning SHWEDAGON Pagoda is the center piece of Yangon city which itself is famous for the best British colonial era architecture Of particular interest in many shops of Bogyoke Aung San Market and of world renown are Myanmar s precious stones rubies sapphires and jade At night time Chinatown comes alive with its pungent aromas and delicious street food The conference is intended as an international forum for the researchers and professionals in all areas of genetic and evolutionary computing      **Prescribing Our Future** Diane M. Deb,2004-10-12 The two volume set LNCS 3102 3103 constitutes the refereed proceedings of the Genetic and Evolutionary Computation Conference GECCO 2004 held in Seattle WA USA in June 2004 The 230 revised full papers and 104 poster papers presented were carefully reviewed and selected from 460 submissions The papers are organized in topical sections on artificial life adaptive behavior agents and ant colony optimization artificial immune systems biological applications coevolution evolutionary robotics evolution strategies and evolutionary programming evolvable hardware genetic algorithms genetic programming learning classifier systems real world applications and search based software engineering      *Space, Time, and Medicine* Larry Dossey,1982-04-12 What we call modern physics says something entirely new about the world and how it behaves For many years these theories have been accepted as the most accurate descriptions we have ever had about our world Nevertheless medicine has been reluctant to incorporate these ideas into itself continuing to view the body as a clockwork mechanism in which illness is caused by a breakdown of parts Drawing on his long experience in the practice of internal medicine and his knowledge of modern science Dr Dossey shows how medicine can and must be updated Discussing the new theories of Bell Godel and others he opens up startling questions for medicine Could the brain be a hologram in which every part contains the whole Why have ordinary people been able to raise and lower blood pressure at will control heart rate body temperature even one minute blood vessel in a way no one can explain What is the role of consciousness in health and illness Perhaps the most startling of Dr Dossey s discussions concerns nonlinear time There is evidence that our obsession with time and our belief that time flows a belief refuted by the new physics may profoundly affect our health Time sickness is becoming an accepted medical concept a possible cause of the greatest killer of all heart disease Dr Dossey presents remarkable clinical data showing that by changing their view of time people have been able to positively affect the course of disease Just as the clockwork picture of the universe was abandoned in the onslaught of new data our mechanistic view of health and illness will give way to new models which too will be more consistent with the true face of the universe
