**Student Engagement and Participation: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2017-06-19 The delivery of quality education to students relies heavily on the actions of an institution's administrative staff. Effective teaching strategies allow for the continued progress of modern educational initiatives. Student Engagement and Participation: Concepts, Methodologies, Tools, and Applications provides comprehensive research perspectives on the multi-faceted issues of student engagement and involvement within the education sector. Including innovative studies on learning environments, self-regulation, and classroom management, this multi-volume book is an ideal source for educators, professionals, school administrators, researchers, and practitioners in the field of education.

**Cases on Historical Thinking and Gamification in Social Studies and Humanities Education** Martínez-Hita, María, Carrasco, Cosme Jesús Gómez, Miralles-Martínez, Pedro, 2022-06-30 Research on history education and historical thinking is becoming increasingly relevant internationally. The need for a renewal of history education is not only justified by the epistemology of history itself but also by the demand for a methodological change in education in general, making students active protagonists in the construction of their learning and based on the development of competencies. Further study on the potential use of gamification within social studies and humanities education is required to understand its benefits and challenges. Cases on Historical Thinking and Gamification in Social Studies and Humanities Education proposes and analyzes gamification as a pedagogical innovation that can enable the renewal of the teaching and learning process of history, facilitating the active learning of historical thinking concepts while influencing students' conceptions of history as a discipline and as a school subject. Covering key topics such as historical thinking, social sciences, video games, and mobile learning, this reference work is ideal for historians, policymakers, researchers, scholars, academicians, practitioners, instructors, and students.

**Differentiating Instruction With Menus** Laurie E. Westphal, 2021-09-03 Differentiating Instruction With Menus Biology offers teachers everything needed to create a student-centered learning environment based on choice. This book presents six different types of menus that students can use to select exciting, advanced-level products that they will develop so teachers can assess what has been learned instead of using a traditional worksheet format. Topics addressed include biology basics, biodiversity, and environments, genetics, human body systems, and the different phyla typically included in the biology curriculum. Differentiating Instruction With Menus Biology contains attractive, reproducible menus, each based on the levels of Bloom's revised taxonomy as well as incorporating different learning styles. These menus can be used to guide students in making decisions as to which products they will develop after studying a major concept or unit. Grades 9-12.
