The International Response to Somali Piracy Bibi van Ginkel, Frans-Paul van der Putten, 2010-09-24 The recent surge in piracy attacks off the coast of Somalia has triggered an international response which is unprecedented in terms of the number of actors involved The International Response to Somali Piracy presents a comprehensive treatment of the international response to Somali piracy exploring current initiatives to counter the piracy threat both operationally and legally Moreover the book analyzes the regional and broader international context within which these initiatives are taken and identifies the challenges and opportunities for international cooperation on fighting piracy at sea This volume brings together experts from a great variety of different backgrounds and disciplines *The African State in a Changing Global Context* István Tarrósy, Loránd Szabó, Göran Hydén, 2011 During the first 25 years of independence the African state was largely driven from within by the ambition to establish political order in a world where national sovereignty over issues of development was not in question The theme of this book is that more is at stake today than in the past China and the European Union in Africa Benjamin Barton, 2016-05-23 China's rise on the international scene over the past few years has correlated with its exponential economic growth The European Union EU the world's largest development aid provider has been feeling the heat of Beijing's closer ties with Africa As a result the EU's overall policy making towards Africa has suffered from a loss of credibility and this has been further exposed both by the success of China's investments in Africa and by the favourable response that China's investment proposals have received from African leaders Dividing the book into five parts the editors and an outstanding line up of Chinese and European contributors guide the reader through the complexities of China's rising influence in Africa but they also analyse if and how the EU should adapt to this Planning Guide for Power Distribution Plants Hartmut Kiank, Wolfgang Fruth, 2012-01-27 When planning an industrial power supply plant the specific requirements of the individual production process are decisive for the design and mode of operation of the network and for the selection and design and ratings of the operational equipment Since the actual technical risks are often hidden in the profound and complex planning task planning decisions should be taken after responsible and careful consideration because of their deep effects on supply quality and energy efficiency This book is intended for engineers and technicians of the energy industry industrial companies and planning departments It provides basic technical network and plant knowledge on planning installation and operation of reliable and economic industrial networks In addition it facilitates training for students and graduates in this field In an easy and comprehensible way this book informs about solution competency gained in many years of experience Moreover it also offers planning recommendations and knowledge on standards and specifications the use of which ensures that technical risks are avoided and that production and industrial processes can be carried out efficiently reliably and with the highest quality **Greece Country Study Guide Volume 1 Strategic Information and Developments** IBP USA, 2013-08 Greece Country Study Guide Strategic Information and Developments Volume 1 Strategic

This book explores the complex interplay between maritime insurance and piracy in the Indian Ocean a crucial global trade route Drawing on rich oral histories this work delves into the lives of seafarers and insurance experts who confront the harsh realities of Somali piracy Through a series of compelling case studies including the notorious Maersk Alabama hijacking the book sheds light on the evolving role of maritime insurers as they navigate the precarious waters of risk management It highlights how these companies not only provide financial protection but also shape maritime security practices transforming the sea into a managed space of governance Spanning a geographical range from the Horn of Africa to global maritime hubs the book emphasises the human cost of piracy and the often overlooked experiences of those at sea Bridging between historical cases and contemporary challenges the book advocates a deeper understanding of the maritime landscape Furthermore by exploring the perspectives of seafarers the book provides a unique insight into the emerging challenges faced at sea and the importance of safety in moments of maritime insecurity This book will be of much interest to students of maritime security naval policy the history of insurance and international relations **An EU Innovative External Action?**

Ludovica Marchi Balossi-Restelli, 2011-07-12 An EU Innovative External Action discusses both the EU's growing challenges from its near and far neighbourhood and the developments within the EU that seek to meet them The European Security Strategy 2003 and its updating 2008 have pointed out some of the growing external problems These documents have outlined the goals for the EU's future activity in terms of general principles and policy rather than of specific actions adopting a holistic approach covering a wide range of civilian responses as well as the military dimension of security This book is an empirical investigation which reflects these different aspects and pressures exploring the interaction between resources and capacities policies and processes and influences from within and outside the EU Its main argument is the need for the EU to work towards meeting its external challenges by developing innovative action The crucial challenges that this volume explores include the EU's approach to the European External Action Service the EU's handling of Russia China and Iran the legal aspects of the Common Security and Defence Policy's CSDP military operations legal issues regarding the EU's combating of piracy and armed robbery in the CSDP Operation Atalanta the influences and issues inherent in the EU's coordination of the above military marine operation the political control and strategic direction on decision making by the Political Security Committee the establishment of the EU's rapid reaction force within the CSDP framework and its present in action and the CSDP's experimentation in the promotion of peace and security on the African continent This volume examines EU behaviour in the above policy areas and issues and how the Union is dealing with the risks it faces today This book aims to promote an interdisciplinary debate The contributions to this volume originated from a workshop concerned with the European Union Facing External Challenges held at Pembroke College Cambridge in October 2009 organised with the support of Geoffrey Edwards POLIS University of Cambridge These reflect the views of experts from various nations and

institutions operating in diverse cultural realities and fields The rationale for employing interdisciplinary resources is in line with the way in which the European Union and the European Commission are encouraging a dialogue about EU policies The authors are academics political analysts from think tanks and officials from the European Commission and the European Council all involved at various levels in European affairs They are Laure Delcour G rard Dejou Andrea deGuttry Elina Dzalbe Roxane Farmanfarmanian Ludovica Marchi Balossi Restelli Jing Men Antonio Missiroli Frederik Naert and Alex Vines Jolyon Howorth Yale University contributed to the workshop as a discussant and this is noticeable in the building up of the book s argument An EU Innovative External Action will be of interest to students and scholars of European studies focused on EU s external challenges policy makers involved in European affairs and the wider public

Somali Piracy Jade Lindley, 2016-06-23 Maritime piracy off the coast of Somalia was first recognised as a global concern in 2008 after the hijackings of World Food Programme vessels It remains a serious impediment to international maritime trade and a significant risk to seafarers Bringing a criminological perspective to the subject this book presents an analysis of Somali piracy by means of Routine Activity Theory and regulatory pluralism Based on data from a range of sources including published documents and in depth interviews with representatives of industry government and international organisations the study concludes that no one institution or policy will suffice to control Somali piracy Accordingly a number of different actors and institutions have a role to play in reducing the supply of motivated offenders the vulnerability of prospective victims and in enhancing guardianship The book envisages a holistic counter piracy program based on a pluralistic regulatory model that is sustainable within the region and managed by the region providing the best opportunity for both the immediate future and for long term success This study will be essential reading for criminologists public policy and legal scholars as well as policy makers and regulators in countries affected by and dealing with piracy and international professional advocacy groups operating in the maritime space

The IMLI Treatise On Global Ocean Governance David Joseph Attard, Rosalie P Balkin, Donald W Greig, 2018-07-04 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically With seemingly no opportunity for revision due to the Convention's burdensome amendment provisions complementary mechanisms dealing with such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations This approach is inherently fragmented and unable to achieve sustainable global ocean governance In light of

the Sustainable Development Goals SDGs particularly Goal 14 the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans The volume examines how the IMO with 171 Member States and 3 Associated Members has and continues to promote the goals of safe secure sound and efficient shipping on clean oceans It studies the interface and interaction between UNCLOS and IMO instruments and how IMOs safety security and environmental protection conventions have contributed to global ocean governance including the peaceful order of the polar regions

The EU, Strategy and Security Policy Laura Chappell, Jocelyn Mawdsley, Petar Petrov, 2016-05-26 This edited collection is a timely and in depth analysis of the EU s efforts to bring coherency and strategy to its security policy actions Despite a special European Council summit in December 2013 on defence it is generally acknowledged that fifteen years since its inception the EU s Common Security and Defence Policy CSDP has yet to acquire a clear sense of purpose This book investigates those areas where the EU has established actorness in the security and defence field and asks whether they might constitute the elements of an emergent more coherent EU strategy on security Taking a critical view the contributors map the EU s strategic vision s across particular key regions where the EU has been active as a security actor the strategic challenges that it has pinpointed alongside the opportunities and barriers posed by a multiplicity of actors interests and priorities identified by both member states and EU actors By doing this we demonstrate where gaps in strategic thinking lie where the EU has been unable to achieve its aims and offer recommendations concerning the EU s future strategic direction This book will be of much interest to students of European security EU policy strategic studies and IR in general
