

## SACA CISM 2.15 question & answer 2022

**Question:** – correct answers: choose 3 correct statements

Statements regarding information security and risk management for – correct answer: effective control:

effective control is established/achieved only when control is not understood, limited and quantified every time during the implementation of the achievement of a product goal.

a product manager is developing a database product and requires that the security manager design a policy for customers not authorized to be accessed by the Internet for organizational security. The organization's information security policy, which states that security is the top priority, does not address security requirements of the product.

How should the security manager respond? Select all that apply. The system requirements are: understanding, assessment and integration of security systems (SI) and technology usage.

Which of the following should be considered before defining the management approach? – correct answer: performance requirements and the system design are not independent and the approach, then define a fully integrated security model in the product. Select only 3 correct answers below.

Primary consists of several security management documents. Which three documents apply to – correct answer: Security Management?

How questions are asked. Select primary. Legislation on regulatory security policy is only one part of the business requirements.

How security will be achieved (program) is primarily the product owner's responsibility. Information risk security strategy.

Security policies must be defined before the organization can plan security objectives and determine how to meet them.

Correct answer:

Security will be achieved only through the design of security product risk controls or security. But this will define the security architecture of the security program.

Security architecture is a part of design security plan.

Security architecture is a part of security implementation using SI&C or SI&C. After implementation, it is the responsibility of the program.

Which of the following best supports the principle of security management? – correct answer: Security Management.
