

# GRE Essay Sample

Even though agreements may contain value, the juxtaposition of various ideas within a conflict unquestionably leads to a more important evolution and progress. As such, what scientific progress can we have without the presence of an intellectual debate? Basically, none. An intellectual debate is very important as it results to scientific progress.

For example, the transformation and reformation of an outdated political concept and idea can also be marked with a struggle. Also, personal growth, as well as that of a society, can easily arise out of conflict. According to the details in history, scientific progress has always been inspired by different conflicts of ideas. For instance, back in the sixteenth century, a huge debate arose apparently since Copernicus challenged the idea that the earth is actually the center of the entire solar system. Even though he paid a huge price both politically and socially for such remonstrance, he tried to dispute a belief that has long been respected. Due to such conflict, humankind has eventually received a new and more appropriate understanding in the field of science and astronomy.

Another hypothesis is that sociohistorical evolution also comes rarely about without any unrest and turmoil. For instance, before the year 1860, it was legally allowed in the USA to enslave other individuals, viewing them as their property with only a few human rights. That resulted to the Civil War, a very violent conflict which even threatened to destroy the entire country. It goes to show that conflict serves responsible for a lot of upward surges in the history of mankind in different areas. In the field of history, science and personal characters, progress need conflict as part of its necessity. It is also beneficial to balance the human condition, not just among smaller groups, but among nations in general.
