Lab Manual For Labview On Dsp:

Digital Signal Processing System-Level Design Using LabVIEW Nasser Kehtarnavaz, Namjin Kim, 2011-04-01

LabVIEW Laboratory Virtual Instrumentation Engineering Workbench developed by National Instruments is a graphical programming environment. Its ease of use allows engineers and students to streamline the creation of code visually, leaving time traditionally spent on debugging for true comprehension of DSP. This book is perfect for practicing engineers as well as hardware and software technical managers who are familiar with DSP and are involved in system level design. With this text, authors Kehtarnavaz and Kim have also provided a valuable resource for students in conventional engineering courses. The integrated lab exercises create an interactive experience which supports development of the hands-on skills essential for learning to navigate the LabVIEW program. Digital Signal Processing System Level Design Using LabVIEW is a comprehensive tool that will greatly accelerate the DSP learning process. Its thorough examination of LabVIEW leaves no question unanswered. LabVIEW is the program that will demystify DSP, and this is the book that will show you how to master it. A graphical programming approach to LabVIEW for DSP system level design, DSP implementation of appropriate components of a LabVIEW designed system, providing system level hands-on experiments for DSP lab or project courses. Practical Applications and Solutions Using LabVIEW™ Software Silviu Folea, 2011-08-01. The book consists of 21 chapters which present interesting applications implemented using the LabVIEW environment belonging to several distinct fields such as engineering, fault diagnosis, medicine, remote access, laboratory, internet, communications, chemistry, physics, etc. The virtual instruments designed and implemented in LabVIEW provide the advantages of being more intuitive, of reducing the implementation time, and of being portable. The audience for this book includes PhD students, researchers, engineers, and professionals who are interested in finding out new tools developed using LabVIEW. Some chapters present interesting ideas and very detailed solutions which offer the immediate possibility of making fast innovations and of generating better products for the market. The effort made by all the scientists who contributed to editing this book was significant, and as a result, new and viable applications were presented. **Web-Based Control and Robotics Education** Spyros G.

Teaching should be such that what is offered is perceived as a valuable gift and not as a hard duty. Albert Einstein. The second most important job in the world, second only to being a good parent, is being a good teacher. S. G. Ellis. The fast technological changes and the resulting shifts of market conditions require the development and use of educational methodologies and opportunities with moderate economic demands. Currently, there is an increasing number of educational institutes that respond to this challenge through the creation and adoption of distance education programs in which the teachers and students are separated by physical distance. It has been verified in many cases that with the proper methods and tools, teaching and learning at a distance can be as effective as traditional face-to-face instruction. Today, distance education is primarily performed
