CASE

A large, oval-shaped petri dish is the central focus of the cover. It contains a bacterial culture on a grid-patterned agar surface. The culture shows several distinct colonies: a large, irregular, and dense one in the lower right, and several smaller, more discrete ones in the upper left and middle. The colors are warm, with yellows, oranges, and reds, suggesting a specific type of bacterial growth or staining. The petri dish is set against a solid yellow background.
