 John Bach McMaster,1896 **Anglo-German Theatrical Exchange** ,2015-02-04 Through the great diversity of topics and
 methodologies the essays in this volume make a seminal contribution to an under researched field at the intersection of
 literary and cultural criticism comparative literature and theatre as well as translation studies The essays cover a wide range
 of texts from the eighteenth to the twenty first century From a broad variety of perspectives the exchange between drama
 and theatre of the Anglophone and the Germanophone worlds and their mutual influence are explored While there is a focus
 on the successful or unsuccessful bridging of the cultural gaps due consideration is given to the nexus between intercultural
 translation and mise en sc ne as well as the intricacies of intermedial reshaping Always placing the analyses within the
 political and socio historical contexts the essays make an innovative contribution to the aesthetics of Anglo German theatrical
 exchange as well as to European cultural history *The Shock and Vibration Digest* ,1989 *The Cass Lectureship Series*

Psychology Tyson Stolte,2022-07-14 Dickens and Victorian Psychology Introspection First Person Narration and the Mind
 positions Charles Dickens s fiction in the midst of Victorian psychological debate tracking Dickens s increasing reliance over
 the course of his career on the introspective mode those moments from free indirect discourse to first person narration in
 which Dickens attempts to represent the inner view of his characters minds In the middle of the nineteenth century
 introspection remained the central investigative method for dualist psychologies theories that tied the mind s immortality to

its immateriality Because those psychologies found evidence of the mind's ontological difference from the body in the subjective experience of consciousness this book argues that the moments of inwardness in Dickens's fiction in both their form and their content constitute efforts to resist the encroachment of psycho physiology by making a case for the mind's transcendence of the body Yet Dickens and Victorian Psychology also shows the consequences of a material psychology's appropriation of such an inward view as well as the results of the efforts by psycho physiologists to redefine the terminology of a mainstream dualism by tracing the ambiguities and contradictions that find their way into Dickens's representations of the mind In these ways this book reveals an overlooked context for Dickens's experiments with narrative point of view and broadens our understanding of the strategies that a material psychology used to assuage the anxieties of those who saw psycho physiology as a threat to immortality **Applications of Small Unmanned Aircraft Systems** J.B.

Sharma,2019-10-18 Advances in high spatial resolution mapping capabilities and the new rules established by the Federal Aviation Administration in the United States for the operation of Small Unmanned Aircraft Systems sUAS have provided new opportunities to acquire aerial data at a lower cost and more safely versus other methods A similar opening of the skies for sUAS applications is being allowed in countries across the world Also sUAS can access hazardous or inaccessible areas during disaster events and provide rapid response when needed Applications of Small Unmanned Aircraft systems Best Practices and Case Studies is the first book that brings together the best practices of sUAS applied to a broad range of issues in high spatial resolution mapping projects Very few sUAS pilots have the knowledge of how the collected imagery is processed into value added mapping products that have commercial and or academic import Since the field of sUAS applications is just a few years old this book covers the need for a compendium of case studies to guide the planning data collection and most importantly data processing and map error issues with the range of sensors available to the user community Written by experienced academics and professionals this book serves as a guide on how to formulate sUAS based projects from choice of a sUAS flight planning for a particular application sensors and data acquisition data processing software mapping software and use of the high spatial resolution maps produced for particular types of geospatial modeling Features Focus on sUAS based data acquisition and processing into map products Broad range of case studies by highly experienced academics Practical guidance on sUAS hardware sensors and software utilized Compilation of workflow insights from expert professors and professionals Relevant to academia government and industry Positional and thematic map accuracy UAS curriculum development and workflow replicability issues This book would be an excellent text for upper level undergraduate to graduate level sUAS mapping application courses It is also invaluable as a reference for educators designing sUAS based curriculum as well as for potential sUAS users to assess the scope of mapping projects that can be done with this technology *A History of the People of the United States During Lincoln's Administration* John Bach McMaster,1927 *The Canadian Historical Review* ,1997 Railroad Age Gazette ,1876 **Railroad Gazette** ,1876
