

CHIMERA PATTERNS

A chimera is the result of two embryos merging early on. The cat is a mix of 2 different cell lines and can have unusual colour or pattern combinations.

Mix of solid + tabby cell lines

Mix of dense + dilute colours

Mix of pointed + non-pointed

Mix of longhair and shorthair patches
(the patches may also be different colours)

Mix of solid + tabby cell lines
where one embryo was tortoiseshell

Mix of dense + dilute colours

White spotting can occur on any of these patterns.

A half-and-half face in normal tortie colours is not a sign of a chimera.
It's a normal tortie variation!
