Formative Assessment and Grading Susan M. Brookhart, 2013-01-11 What is a rubric A rubric is a coherent set of criteria for student work that describes levels of performance quality Sounds simple enough right Unfortunately rubrics are commonly misunderstood and misused The good news is that when rubrics are created and used correctly they are strong tools that support and enhance classroom instruction and student learning In this comprehensive guide author Susan M Brookhart identifies two essential components of effective rubrics 1 criteria that relate to the learning not the tasks that students are being asked to demonstrate and 2 clear descriptions of performance across a continuum of quality She outlines the difference between various kinds of rubrics for example general versus task specific and analytic versus holistic explains when using each type of rubric is appropriate and highlights examples from all grade levels and assorted content areas In addition Brookhart addresses Common misconceptions about rubrics Important differences between rubrics and other assessment tools such as checklists and rating scales and when such alternatives can be useful and How to use rubrics for formative assessment and grading including standards based grading and report card grades Intended for educators who are already familiar with rubrics as well as those who are not this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other sources And it makes the case that rubrics when used appropriately can improve outcomes by helping teachers teach and helping students learn

Assessment in Science D.P. Shepardson, 2011-06-27 Assessment in Science combines professional development and classroom practice in a single volume The pragmatic nature of the book makes it a valuable resource for administrators and staff developers interested in designing professional development programs and for science teachers looking for techniques and examples of classroom based assessments Unique features of Assessment in Science include 1 practical strategies and tools for implementing successful professional development programs in science assessment 2 teacher stories and case studies about classroom based assessment practice and how these teachers changed their assessment practice 3 examples of classroom based assessments and scoring guides 4 samples of student work with teacher commentary and 5 examples of how the national reform documents in science education served as tools in professional development programs and in designing classroom based assessments Assessment in Science expands the existing literature on science assessment by sharing a model for professional development and examples of teacher developed assessments with accompanying student work and teacher commentary Chapters written by science teachers tell how they assess students and how they have changed their assessment practice as well as how changing assessment practice has resulted in a change in their science instruction Assessment in Science is targeted at practising professionals in science education administrators staff developers science teachers and university science educators Assessment in Science has applicability to graduate level courses in science education and in service courses for science teachers The teacher chapters are also appropriate for use in undergraduate science methods courses to illustrate classroom based assessments
