**Measuring Vulnerability in Developing Countries** Wim Naude, Amelia Santos-Paulino, Mark McGillivray, 2014-10-29  
In all of the major challenges facing the world currently whether it be climate change terrorism and conflict or urbanization and demographic change no progress is possible without the alleviation of poverty New approaches in development economics have in recent years started from the premise that we cannot successfully deal with poverty unless we also deal with vulnerability but not only vulnerability to income poverty but also vulnerability to various others hazards such as climate conflict macroeconomic shocks and natural disasters This book provide insights into new approaches in conceptualising and measuring vulnerability It includes chapters dealing with advanced issues such as the compilation of economic vulnerability indices EVIs on a macro level of conceptualizing and measuring local vulnerability across regions in a country and of measuring the flip side of vulnerability namely resilience The book also explores the sensitivities of the various measurements of vulnerability to vulnerability lines poverty lines and permanent income with consideration to some of the most vulnerable groups in developing countries Overall the contributions in the book consolidate new approaches as far as the concept and measurement of vulnerability on different levels and outcomes are concerned and note directions for future research This book was published as a special issue of Oxford Development Studies

AIDS and Women's Reproductive Health Lincoln C. Chen,Jaime Sepulveda Amor,Sheldon J. Segal,2012-12-06 Over the past decade the AIDS pandemic has propagated so widely and exerted such a devastating impact that one may properly ask the question Why not concentrate all AIDS efforts on disease control alone Why link AIDS with women s reproductive health What is the scientific basis for this linkage And how might AID control and women s health objectives be promoted simultaneously These questions constitute the principal themes addressed in this monograph The 15 chapters in this volume are intended to provide state of the art reviews of key interactions between AIDS and women s reproductive health for an audience of scientists and policy makers in the AIDS and population fields Impetus for this monograph comes in part from what we perceive to be an inadequate global response thus far to AIDS and women s health problems A common platform has failed to emerge among the disparate professional communities working in the areas of AIDS STDs and family planning As a result endeavors in these fields have been isolated and opportunities for joint action have been missed An enormous and as yet unharnessed potential exists for powerful interdisciplinary collaborations that could strengthen policies and programs against these pressing health problems of humankind

### **Inequality and**

**Fiscal Policy**. Mr. Benedict J. Clements, Ruud A. de Mooij, Mr. Sanjeev Gupta, Mr. Michael Keen, 2015-09-21. The sizeable increase in income inequality experienced in advanced economies and many parts of the world since the 1990s and the severe consequences of the global economic and financial crisis have brought distributional issues to the top of the policy agenda. The challenge for many governments is to address concerns over rising inequality while simultaneously promoting economic efficiency and more robust economic growth. The book delves into this discussion by analyzing fiscal policy and its link with inequality. Fiscal policy is the government's most powerful tool for addressing inequality. It affects households' consumption directly through taxes and transfers and indirectly via incentives for work and production and the provision of public goods and individual services such as education and health. An important message of the book is that growth and equity are not necessarily at odds with the appropriate mix of policy instruments and careful policy design. Countries can in many cases achieve better distributional outcomes and improve economic efficiency. Country studies on the Netherlands

China India Republic of Congo and Brazil demonstrate the diversity of challenges across countries and their differing capacity to use fiscal policy for redistribution The analysis presented in the book builds on and extends work done at the IMF and also includes contributions from leading academics
